

The background of the page is a dynamic, abstract composition of numerous diagonal lines and shapes in various colors, including shades of blue, teal, orange, purple, and grey. These elements create a sense of movement and depth, radiating from the bottom right towards the top left.

# Enabling the Leading-Edge Technology

## | Editorial Note

In order to fulfill our responsibility to explain to stakeholders and to inform the wider society of our activities towards the realization of a sustainable society, from fiscal 2015 Advantest Group has changed this report's name from "CSR Report" to "Sustainability Report."

The 2017 Sustainability Report includes information for disclosure items based on the GRI's G4 Sustainability Reporting Guidelines, with the information disclosed collated in a forward-looking manner.

### ■ Changes in report

- 2000: Environmental Report
- 2006: Social and Environmental Report
- 2007: CSR Report
- 2015: Sustainability Report

## Scope of Report and Period Covered

This report covers activities pursued by Advantest and its major affiliates in Japan and overseas throughout fiscal 2016 (April 1, 2016 to March 31, 2017).

\* Some activities before and after fiscal 2015 are also featured in the report, with the aim of facilitating reader understanding.

## Release date / Reporting cycle

September 2017 (Annually)

## Guidelines Referenced

- Global Reporting Initiative's Sustainability Reporting Guidelines Ver. 4.0.
- Ministry of the Environment, "Environmental Reporting Guidelines 2012"

## Message from CEO

Sustainability Report 2017

## Electronic Measurement Technologies Contribute to Sustainable Development

Since our founding in 1954, Advantest has refined our electronic measurement technologies and grown organically in step with the electronics industry. Semiconductor test systems, our current flagship products, test whether semiconductors work as designed without malfunctioning. These semiconductors are used in various products that we all rely on in our daily lives. Thus, Advantest contributes to worldwide safety and security through measurement technology.

Currently, the digital revolution is embedding innovations such as IoT, AI, deep learning, self-driving cars, and more into our daily lives. In the future, semiconductors will have even higher performance, while being smaller and consuming less power. Higher reliability will be more important than ever. As Advantest does business around the world, we are striving to globalize our management team and strengthen the global network of the Advantest Group, to further support the innovations needed not only in Japan but in the semiconductor industry worldwide.

In 2016, Advantest set out important issues (materialities) and evaluation metrics to address as a part of our commitment to sustainability, including sustainable financial performance, establishment of a compliance system, reduction of environmental impact, and prevention of corruption. We are currently examining details for each materiality such as related personnel and policies, and will disclose our findings together with the results of our activities in our FY2017 Sustainability Report. We will continue activities targeting improvement in these areas, aiming for medium- to long-term enhancement of corporate value.

Advantest will continue to develop superior electronic measurement technologies to respond to society's needs and issues as they arise, furthering our contribution to sustainable development worldwide. Together with our stakeholders, I look forward to a bright future of shared prosperity and ongoing innovation.

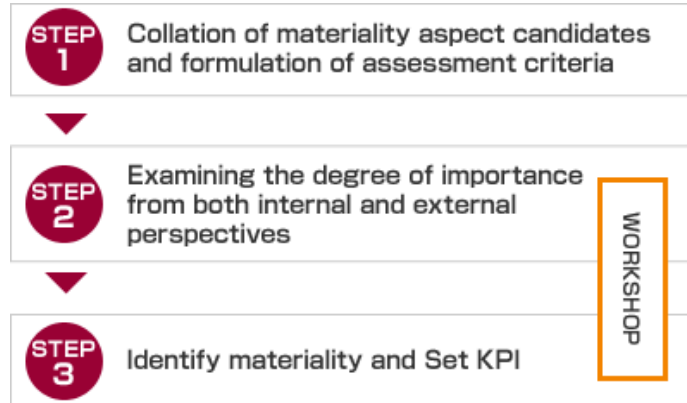

Yoshiaki Yoshida  
Representative Director, President & CEO  
September 2017

**Materiality for the Advantest Group**

Sustainability Report 2017

**Our Approach to Materiality**

At Advantest, we believe that it is vitally important to first identify the impacts that our company's operations have on society and the problems that society expects us to help solve, as a basis for clarifying the key issues that we need to address in our CSR activities, so that we can then go on to implement effective management based on specific key performance indicators (KPIs). To this end, in FY2015 we used a three-step process with reference to the Global Reporting Initiative (GRI) G4 Sustainability Reporting Guidelines, to identify what constitutes materiality for the Advantest Group.

**The Process of Identifying Materiality**

**Step 1: Collation of materiality aspect candidates and formulation of assessment criteria**

A total of 50 materiality aspect candidates were identified on the basis of the 46 aspects listed in the Global Reporting Initiative (GRI) G4 Sustainability Reporting Guidelines, the requirements of the EICC® \*, industry standards such as SASB\*, and information obtained from CSR surveys submitted to customers.

Assessment criteria were then formulated so as to be able to rank the materiality aspect candidates in priority order, taking into account the need to maintain consistency with respect to boundaries and business risk.

\* EICC®: Electronic Industry Citizenship Coalition / Electronic Industry Code of Conduct

\* SASB: Sustainability Accounting Standards Board (U.S.A.)

**Step 2: Examining the degree of importance from both internal and external perspectives**

A Materiality Identification Project Team was established (with Team members that included CSR Working Group members, representatives of relevant departments and responsible directors), and three Workshops were held. Materiality was examined in terms of both the level of importance as viewed by stakeholders, and the degree of importance to the Advantest Group.

**Step 3: Identify materiality and set KPI**

The identified materiality items were submitted to the Managing Executive Officers Committee for approval.

Following the approval of the materiality items by the Managing Executive Officers Committee, the Materiality Identification Project Team discussed the key performance indicators (KPIs). KPIs were set with 1 – 2 indicators per materiality aspect.

**Identified Materiality Aspects and Corresponding KPIs Aspects**

Category	Identified materiality aspect	KPI	Measures implemented
Economy	Economic performance	Sales and operating income margin	<a href="#">Economic Impact</a>
	Intellectual property rights protection	Percentage of employees who have undergone e-learning training relating to intellectual property rights protection	<a href="#">Intellectual Property Protection</a>
Environment	Energy	Rate of improvement in per-unit energy consumption	<a href="#">Global Warming Prevention</a>
	Emissions into the atmosphere	Greenhouse gas emissions (Scope 1 and Scope 2)	<a href="#">Global Warming Prevention</a>
	Discharged water and waste	Waste recycling rate	<a href="#">Recycling Resources</a>
	Hazardous substances	Percentage of suppliers covered by hazardous substance surveys	<a href="#">Environmental Risk and Chemical Substance Management</a>
	Products and services	Percentage of products meeting own green products criteria	<a href="#">Green Products</a>
	Compliance	Number of environmental non-compliance	<a href="#">Environmental Communication / Environmental Contribution Activities</a>
	Supplier environmental assessment	Percentage of new suppliers that were screened using environmental impact criteria	<a href="#">Procurement Practices</a>
Society	Conflict minerals	Continuing efforts to use materials where the risk that said minerals have been produced using conflict minerals is low, by asking business partners to ensure transparency in regard to the sources of materials and components, etc., and by working together with industry organizations and business partners to investigate information relating to conflict minerals (i.e. mineral processing firm information).	<a href="#">Procurement Practices</a>
	Employment	Percentage of employees returning to work after taking childbirth and/or childcare leave	<a href="#">Employment and Diversity</a>
	Occupational health and safety	Occupational accident rate in Japan	<a href="#">Occupational Health and Safety</a>
	Training and education	Average number of hours of training per employee per year	<a href="#">Human Resources Development, Fair Evaluation and Treatment</a>
	Diversity and equal opportunity	Female employees as percentage of total workforce	<a href="#">Employment and Diversity</a>
	Supplier labor practices assessment	Percentage of new suppliers that were screened using labor practices criteria	<a href="#">Procurement Practices</a>

Category	Identified materiality aspect	KPI	Measures implemented
	Non-discrimination	Number of complaints submitted to the helpline that are properly resolved	<a href="#">Compliance</a>
	Supplier human rights assessment	Percentage of new suppliers that were screened using human rights criteria	<a href="#">Procurement Practices</a>
	Anti-corruption	Number of confirmed incidents of improper behavior	<a href="#">Compliance</a>
	Compliance with anti-monopoly legislation	Number of incidents relating to relevant legislation	<a href="#">Compliance</a>
	Compliance	Number of non-compliance instances relating to social issues	<a href="#">Compliance</a>
	Supplier assessment for impact on society	Percentage of new suppliers that were screened using criteria for impacts on society	<a href="#">Procurement Practices</a>
	Customer health and safety	Number of non-compliance of own safety standards	<a href="#">Product Liability</a>
	Customer privacy	Number of complaints relating to information security	<a href="#">Risk Management</a>
	Compliance	Number of non-compliance relating to products/services	<a href="#">Product Liability</a>

**A Message from Advantest’s Director of CSR**

All Advantest’s stakeholders expect us to reconcile the requirements of a sustainable society with the imperatives of our own corporate development. Based on a long-term perspective, we consider our business and CSR activities to be the natural starting point for us to contribute to the various challenges of modern society through our measurement technologies. While bearing our origins in mind, we will fulfill our dual responsibility to improve corporate value by generating profit, and contribute to the development of a sustainable society, throughout all our corporate activities, including our supply chain.

In fiscal 2015, we launched a project to formulate materialities, staffed by our in-house CSR working group, the managers of relevant departments, and executive officers with related responsibilities. The project discussed which topics to emphasize and identified 24 materialities. This initiative also prompted a review of our business development process from the perspectives of supply chain complexity and delegation of responsibilities.

In FY2016, we established KPIs (Key Performance Indicators) for each materiality identified, and have started activities targeted for completion in FY2018. Regarding the reduction of overtime hours, we have been able to hold overtime to a slight increase compared with the previous fiscal year, despite rapid growth in our business. In green products, we have delivered significant reductions in power consumption and footprint in our new products. Moreover, as part of our commitment to environmental management, we have promoted environmental measures in various areas, such as purchasing a 100% green electricity supply for offices in the United States.

In FY2017, we will further promote activities designed to achieve our objectives, and will enhance our worldwide CSR efforts via activities in the 16 countries in North America, Europe, Asia and other regions where we have a business presence.

Koichi Tsukui (Director and Managing Executive Officer)

## Management Approach

Sustainability Report 2017

### Basic Stance

Recognizing that promoting a harmonious relationship with the Earth is an important management issue, Advantest is contributing to the global environment protection and the realization of a sustainable society in line with the Advantest Group Environmental Policy.

To this end, Advantest is implementing various measures based on identified materiality aspects, including measures that provide a solid foundation for compliance with relevant laws and regulations and for the minimizing of environmental load, etc., as well as working to reduce the amount of energy consumed in Advantest's business activities, developing more environmentally-friendly products, etc.

### Identified Materiality Aspects and KPIs, and Targets for FY2018

Materiality Aspect	KPI	Measures implemented
Energy	Rate of improvement in per-unit energy consumption	<a href="#">Global Warming Prevention</a>
Emissions into the Atmosphere	Greenhouse gas emissions (Scope 1 and Scope 2)	<a href="#">Global Warming Prevention</a>
Discharged Water and Waste	Waste recycling rate	<a href="#">Recycling Resources</a>
Recycling Resources	Percentage of suppliers covered by hazardous harmful substance surveys	<a href="#">Environmental Risk and Chemical Substance Management</a>
Products and Services	Percentage of products meeting own green products criteria	<a href="#">Green Products</a>
Compliance	Number of environmental non-compliance	<a href="#">Environmental Contribution Activities / Environmental Communication</a>
Supplier Environmental Assessment	Percentage of new suppliers that were screened using environmental impact criteria	<a href="#">Procurement Practices</a>

### Looking Ahead to the Future

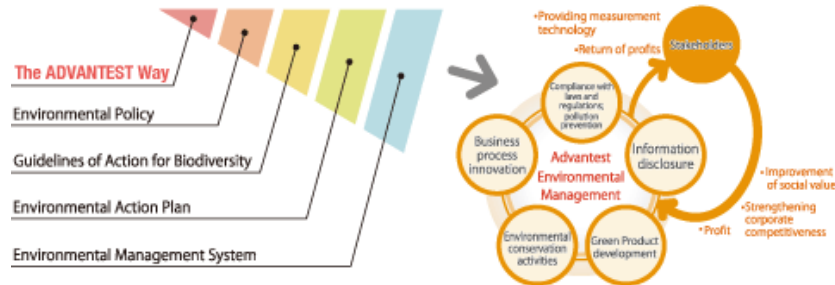

The identified materiality aspects relating to the environment are being incorporated into the department objectives in Advantest's Business Plan, and into the environmental objectives set for the company's environmental management; Advantest will continue its efforts to implement ongoing efforts in this regard.

**Environmental Management**

Sustainability Report 2017

**Basic Policy**

Through its business activities, the Advantest Group contributes to the sustainable development of society. We also strive for environmental protections such as measures against climate change and conservation of biodiversity as well as use renewable resources such as energy and water resources to actively endeavor in the environmental conservation activities below together with all our employees as an enterprise that deserves society's trust.

**Advantest Group Environmental Policy**

**1. Promoting Environmental Management**

By maintaining our environmental management system, we promote global environmental conservation efforts that achieve environmental targets set for both our business activities and environmental concerns.

**2. Reduction of Customers' Environmental Burden**

We promote energy conservation, improved recyclability, and the elimination of hazardous substances to provide environmentally-friendly products and services that contribute to our customers' reduction of their environmental burdens, giving consideration to the life cycle of our products: from materials procurement to waste disposal.

**3. Better Workplace Procedures**

We reform work procedures to continually improve our environmental performance by creating environmentally friendly products.

**4. Environmental protection and sustainable use of resources**

By being alert to the environmental impact of our business activities, we strive to protect the environment from measures against climate change to the conservation of biodiversity, as well as sustainable use of resources such as energy and water.

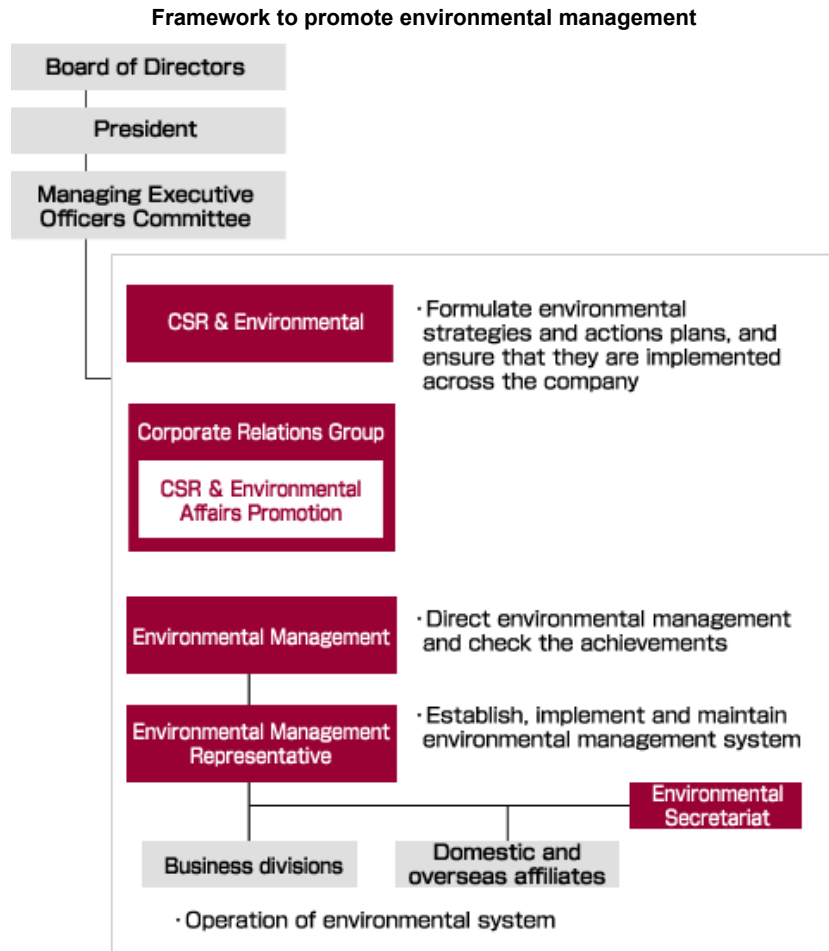

**5. Complying with Environmental Laws and Regulations and Preventing Pollution**

Upholding all environmental laws and regulations and voluntary standards, we protect nature and shield our neighbors from environmental pollution and health hazards caused by chemical substances, waste and other contaminants.

Updated April 1, 2017

**Framework to Promote Environmental Management**

The Advantest Group is building a framework to better promote our global environmental initiatives.

**Acquisition of ISO14001 Certification**

The Advantest Group has acquired integrated ISO14001 certification for its offices, as well as its research, development, and production facilities in Japan. In addition, the Group has acquired ISO14001 certification for its environmental management system, which is based on relevant laws and regulations in each country where it operates. Under the uniform standards provided by ISO14001, we are promoting initiatives to reduce energy use, hold down waste generation, develop and provide environmentally friendly products (green products), and reduce the environmental impact of our business activities.

We have been promoting measures to facilitate the transition to ISO14001:2015 at all business locations since fiscal 2015 and have begun operation of the 2015 version as of April 2017. We plan to complete this transition by 2018.

**Acquisition of ISO14001 certification**

As of March 31, 2017

Company	(Base)	First acquisition of ISO14001 certification
ADVANTEST CORPORATION (Including business affiliates)		Aug. 2000 (Integrated certification)
	Head Office	(Nov. 2009)
	Advantest Laboratories Ltd./Sendai Factory	(Feb. 2000)
	Gunma R&D Center	(Apr. 2002)
	Saitama R&D Center	(Oct. 2003)
	Kitakyushu R&D Center	(Mar. 2003)
	Gunma Factory	(Apr. 1998)
Advantest America, Inc.		Oct. 2008

	Boeblingen, Germany	
Advantest (Singapore) Pte. Ltd.		June 2008
Advantest (M) Sdn. Bhd. (Penang - Malaysia)		Sept. 2008
Advantest Korea Co., Ltd.		July 2008
Advantest Taiwan Inc.		Dec. 2006
Advantest (China) Co., Ltd. (Certification includes following subsidiaries)		May 2008
	Advantest (Suzhou) Co., Ltd.	
	Advantest Technology (Shanghai) Co., Ltd.	

Bureau Veritas certification (copy)

Advantest Corporation ISO14001 certifications scope

As of December 2016

<b>Applicable standards</b>	ISO14001: 2004
<b>Certificate No.</b>	3640963
<b>Scope of certification</b>	Research, development, design, manufacture and services (repair) of semiconductor and component test systems, mechatronics systems
<b>Certification body</b>	Bureau Veritas Certification Holding SAS
<b>Original cycle start date</b>	December 8, 2000 (Acquisition of ISO14001:1996 certification at the Gunma Factory on April 21, 1998)
<b>Date of integrated certification</b>	Integrated as Advantest Group as of December 8, 2000.
<b>Applicable business locations</b>	Gunma RR&D Center, Head Office, Saitama RR&D Center, Gunma Factory, Kitakyushu RR&D Center, Advantest Laboratories R& Sendai Factory (Including each business affiliate)

**Implementation of Internal Environmental Audits**

At Advantest Group we have always implemented regular internal environmental audits on environmental burden reduction activities at each business location in order to confirm internal and external compliance with the operation of the environmental management system (EMS). The regular internal environmental audit that we implemented in fiscal 2016 found no serious defects in regard to the implementation of the EMS. The number of issues increased compared to the previous year and corrective actions have been taken for all of the items. In the future we will continue to make ongoing efforts to improve our environmental management system, and will focus on improving our environmental performance.

**Basic Policy on Environmental Education**

In order to promote environmental protection, each and every employee needs to always feel that the environment is a problem close to their heart, be thinking about what they can and should do both at work and in the home, and transform these ideas into action. Based on this policy, Advantest is implementing environmental education aimed at developing awareness of the environment and the ability to think and take action appropriately.

**Overview of Environmental Education Program**

- Training for new employees
- Education for internal environmental auditors
- Education on chemical substances
- Seeking proposals on environmental VE
- Activities to protect forests

**Implementation of general environmental education in fiscal 2016**

	Target employees	Number of participants	Participation ratio (%)
Japan	2,616	2,616	100
Overseas	2,066	2,047	99.1
Overall	4,682	4,663	99.6

**Introduction of e-learning**

At Advantest, we have introduced an e-learning education system. We have been able to create a system that is both time- and location-independent, allows repetition of learning, and enables more efficient management of e-learning status and results.

In fiscal 2016's ISO14001 general training, we implemented e-learning both in Japan and overseas.

e-learning system screenshot

**Environmental Action Plan**

Sustainability Report 2017

**Environmental Action Plan**

At Advantest Group we are clarifying the important challenges that we should tackle with our environmental activities and we have formulated an “Environmental Action Plan.” With the three key points that are promotion of environmental management, providing green products and, reform of business processes, we are promoting responsible efforts to help realize a recycling society and low-carbon society.

**7th Advantest Environmental Action Plan**

Due to factors such as the expansion of our overseas production operations, the environmental impact of Advantest’s overseas production bases has been growing. Advantest recognizes the importance of promoting environmental measures that take the company’s overseas production bases into account. The 7th Advantest Environmental Action Plan continues to address the issues targeted by the 6th Advantest Environmental Action Plan, while endeavoring to set targets that incorporate overseas business bases. More specifically, the Plan sets targets relating to the promotion of global environmental education, raising the recycling rate at overseas production bases, and promoting the ongoing use of renewable energy, etc.

**Key Issues:**

- 1. Promotion of environmental management: In line with the trend towards the development of a low-carbon society, Advantest is implementing responsible measures in the area of environmental management.**
- 2. Providing green products: In both our core business and our tester peripherals business, Advantest is contributing, through the company’s products, towards reducing customers’ environmental burden.**
- 3. Reform of business processes: Advantest is promoting measures to make business processes and the utilization of energy more efficient.**

Scope (as of March 31, 2017)

1. Measures applicable to: All companies within the Advantest Group  
Six business bases within Japan (including affiliates)  
Seven overseas business bases (AAI, AEG, ASP, ATK, ATC, ATI and AMY)
2. Period covered: Fiscal 2015 – Fiscal 2017 (three years)

Important Challenges	The relationship to environmental policy	Action items	Action items (target details)	Results Achieved in Fiscal 2016
<b>Promotion of environmental management</b>				
	Promotion of environmental management	1) Transition to revised ISO14001.	By FY2017 year-end complete transition to ISO14001: 2015 standard.	<ul style="list-style-type: none"> <li>● Created manuals and instructions to respond to new standards</li> <li>● Conducted briefings about transition measures at each site in Japan</li> </ul>
		2) Promote global environmental education.	Carry out e-learning once a year.	Environmental education is implemented both in Japan and overseas using e-learning. Percentage of employees undergoing e-learning: 99.6%

	3) Promote environmental contribution activities, educational contribution activities.	Promote environmental, social contribution activities and education support activities.	<p>[Within Japan] 8 projects implemented (the main activities are listed below)</p> <ul style="list-style-type: none"> <li>• Conducted special science classes at neighborhood elementary schools with the participation of 130 students</li> <li>• Conducted nature observations with the participation of 90 local elementary school students</li> <li>• Periodically conducted cleaning activities around our business locations</li> </ul> <p>[Overseas] 10 projects implemented (the main activities are listed below)</p> <ul style="list-style-type: none"> <li>• Implementation of bicycle commuting and charity activities (Germany)</li> <li>• Conducted screenings of environmental movies and held energy-saving events (America)</li> <li>• Conducted volunteer activities to clean coastal areas and distributed boiled rice (Singapore)</li> <li>• Conducted recycling and donation activities (Korea)</li> </ul>
Conservation of biodiversity	1) Promotion of forest conservation activities	At each site, carry out forest conservation activities.	A group of 24 Advantest employees volunteered to undertake thinning-out work at the "Kusatsu Therapy Forest".
	2) Biotope development and utilization	Foster and utilize biotope. (Nature observation events targeting neighborhood elementary schools, protection of endangered plants)	The Gunma R&D Center is implementing four biotope-related activities.
Compliance with environmental laws and regulations, prevention of pollution	Promoting resource recycling	Improve waste recycling rate. (*Target values have been adjusted in line with changes in recycling methods for general waste)	
	1) Maintain and management Japanese bases recycling rate Maintain recycling rate of 99% or more of the Japanese bases.	Maintain and management recycling rate of 90% or more of the Japanese bases.	Recycling rate for facilities in Japan: 92%
	2) Improve overseas bases recycling rate	Aim for recycling rate of 65% or more. (Measures: reconfirmation of recycling criteria, review of treatment methods)	Recycling rate for overseas facilities: 65%
	Promotion of measures against global warming (climate change)		
	1) Promotion of efficient use of energy	Achieve an annual average improvement of 1% in per-unit energy consumption at Advantest business bases in Japan. Compared to the reference year FY2012, 5% or more reduction in FY2017 (Aim for 7.73% or more by FY2020)	Implement of more efficient utilization of air conditioning units and of switching off equipment when not required, etc. Rate of improvement in per-unit energy consumption 9.5% reduction compared to FY 2012

		2) Use of renewable energy	Promote the purchase of green power and introduction of solar power in overseas bases.	At AAI and ATK, management is focused on maintaining the current energy use performance. AAI: 9,200 MWh per year ATK: 1,350 MWh per year		
<b>Providing green products</b>						
Reduce customers' environmental burden	1) improvement of energy-saving performance of new products	Reduce power consumption per unit of performance in new products by 20-50%.	Advantest's T5830 Memory Test System realizes a 81% reduction in electric power consumption (compared to the T5781)			
			Advantest's Test System T2000 Air realizes a 30% reduction in the installation area.			
			Advantest's EVA100 (1024 pin) measurement system realizes a 63% reduction in electric power consumption (compared to the T6577)			
			Advantest's M4827 Test Handler realizes a 26% reduction in electric power consumption on a unit performance basis			
			DI products: Actions to equip a moisture absorption device and change the materials of the seal sponge reduced the dry air flow by 7%.			
			2) Resource-saving, size reduction, reducing components and materials	Achieve resource-saving in products, size reduction and reduction in components and materials.	DI products: With HIFIX and custom performance boards (PB), there has been a successful evolution from conventional 0.3mm pitch device to 0.2mm pitch device substrate, making it possible to achieve a 56% reduction in device area.	
					DI products: Measures of the previous year, improvements to technology for mounting probes, and ensuring safety of the yield for each component reduced the required man hour of new devices by 30% compared to existing products for measurement.	
			3) RoHS compliant products, expansion of lead-free mounting products	RoHS compliant in target products, achieve lead-free mounting.	Advantest's EVA100 measurement system realizes a lead-free implementation	
4) alternative to Fluorinert and reduce usage	Establish an alternative cooling technology to Fluorinert and put into practical use.	The reliability of heat conductive materials was evaluated as a main indirect cooling system				
5) Start-up of new business for reduction of environmental burden	Launch new businesses and products related to the environment, and contribute to society.	There were no new proposals in fiscal 2016, but we continued to investigate ideas related to the environment starting in fiscal 2017.				
6) Increase sales of new products	Replace aging testers with new products, to contribute to electric power saving of customers.	Sales performance: 41 units Electric power saving: 1,265.8 kWh/year				
<b>Reform of business processes</b>						
Reform of business processes	Promotion of business efficiency improvements and energy-saving	Promote business efficiency improvements and efficiency in energy usage				

	1) Efficiency improvements in production	Reduce production time and cut production electrified time by 30%	<ul style="list-style-type: none"> <li>• With Advantest's T5851 Memory Test System, the number of days during production in which electric power usage is required has been reduced from 16 days to 10.5 days. The overall amount of electric power used in production has been reduced from 274,560 kWh per unit to 180,180 kWh per unit, a 44% reduction (with a total of 13 units shipped)</li> <li>• With Advantest's T5821 Memory Test System, the number of days during production in which electric power usage is required has been reduced from 17 days to 11.6 days. The overall amount of electric power used in production has been reduced from 244,800 kWh per unit to 167,040 kWh per unit, a 32% reduction (with a total of 8 units shipped)</li> </ul>
	2) Energy-saving in building facilities and efficiency improvement	Renovate old equipment to improve efficiency and equalize electricity usage.	While the planned replacement of older equipment could not be implemented this year, by utilizing equipment more efficiently, it was possible to reduce energy consumption by an amount equivalent to 90 kl of crude oil (compared to FY 2015).
	3) Improve the operational efficiency of product development and production	Conduct information sharing in a production environment that is integrated from the early stage of development, and build a Global PLM that can be expected to improve efficiency globally for a variety of product development and production businesses.	Operation of a PLM system is being prepared.
	4) Reduction of in-house CO <sub>2</sub> emissions due to reduction in time required for MB design, manufacturing and servicing	Streamline MB development and design to reduce CO <sub>2</sub> emissions by 30%.	DI products: An upgraded base simplified cable work in the MB to reduce the manufacturing period by 3 days (200H), providing a reduction in CO <sub>2</sub> emissions equivalent to 600kg/unit (T5821WMB)

**Environmental Communication / Environmental Contribution Activities**

Sustainability Report 2017

**Approach to Materiality in Environmental Compliance**

Advantest business activities have a wide range of environmental impact externally. We know sharing environmental information with our stakeholders and reflecting that information in our environmental management is important to be sincere and continually grow as a company.

<b>Supervising division</b>	CSR & Environmental Affairs Promotion Office
<b>KPI</b>	Environmental compliance violations
<b>FY2018 target</b>	To work to prevent grave legal violations related to the environment before they happen (Grave legal violations related to the environment: 0)
<b>FY2016 result</b>	0
<b>Boundary (scope)</b>	Advantest Corporation (non-consolidated) in Japan
<b>Relevant policies</b>	Advantest Group Environmental Policy
<b>Relevant commitments</b>	Adherence to environmental laws and ordinances
<b>Responsible department/division</b>	CSR & Environmental Affairs Promotion Center/Environmental Management Supervisors
<b>Relevant complaint processing policy</b>	(Corporate Ethics Helpline, dedicated contact window)
<b>Assessment</b>	Maintained 0 incidents

**Basic Stance on Environmental Information Disclosure**

Our business activities have a range of impacts on the environment. In order for us to achieve responsible, continuous development, it is important that we share environmental information with stakeholders and reflect this in our environmental management. At Advantest Group, we disclose information about our environmental burden and activities through reports, our website, exhibitions etc. We are also working to foster communication with local communities, for example through the holding of environmental contribution activities.

**Environmental complaints**

	<b>FY 2013</b>	<b>FY 2014</b>	<b>FY 2015</b>	<b>FY 2016</b>
Complaints from stakeholders	0	0	0	0
Serious violations of environmental laws	0	0	0	0

\*Japan only until FY2015. Includes overseas from FY2016.

**Environmental Information Disclosure Results**

- ▶ [Publication of the company's Sustainability Report \(CSR Report\)](#)

**Environmental Contribution Activities**

We endeavor to foster communication with a variety of stakeholders through environmental contribution activities.

- ▶ Holding of a nature observation event at the Gunma R&D Center's Biotope
- ▶ Conservation activity to protect Japanese red pine trees at the Advantest Laboratories Ltd.
- ▶ Participation in the "Kusatsu Therapy Forest" project to help safeguard areas of state-owned forest
- ▶ Tropical rainforest conservation activity in Malaysia (Borneo)
- ▶ Cleanup activities in the vicinity of Advantest business bases

**Global Warming Prevention**

Sustainability Report 2017

**Materiality of Global Warming Prevention**

- ▶ [Approach to Materiality in Energy](#)
- ▶ [Approach to Materiality in Emissions to the Atmosphere](#)

**Approach to Materiality in Energy**

Advantest consumes a large amount of energy both inside and outside of the company while promoting its business activities. The company considers efficient energy use an important CSR activity for the global environment.

<b>Supervising division</b>	CSR & Environmental Affairs Promotion Office
<b>KPI</b>	Rate of improvement in unit energy consumption
<b>FY2018 target</b>	To promote efficient use of energy to achieve an average 1% annual reduction for the rate of improvement in per-unit energy consumption at business locations in Japan (6% reduction compared to fiscal 2012)
<b>FY2016 result</b>	-9.5%
<b>Boundary (scope)</b>	Advantest Corporation (non-consolidated) in Japan
<b>Relevant policies</b>	Advantest Group Environmental Policy
<b>Relevant commitments</b>	Energy Conservation Act
<b>Responsible department/division</b>	CSR & Environmental Affairs Promotion Center/Environmental Management Officer
<b>Relevant complaint processing policy</b>	(Corporate Ethics Helpline)
<b>Assessment</b>	Good

**Approach to Materiality in Emissions to the Atmosphere**

Advantest considers efforts to reduce the amount of emissions through more efficient energy as vital because efforts to reduce greenhouse gases that should be conducted worldwide are indispensable in global business activities.

<b>Supervising division</b>	CSR & Environmental Affairs Promotion Office
<b>KPI</b>	GHG emissions (Scope 1/2)
<b>FY2018 target</b>	To target 18,000t-CO <sub>2</sub> or less by striving to promote efficient use of energy and reduce the greenhouse gas emissions at business locations in Japan.
<b>FY2016 result</b>	18,225 t-CO <sub>2</sub>
<b>Boundary (scope)</b>	Advantest Corporation (non-consolidated) in Japan
<b>Relevant policies</b>	Advantest Group Environmental Policy
<b>Relevant commitments</b>	Law Concerning the Promotion of the Measures to Cope with Global Warming
<b>Responsible department/division</b>	CSR & Environmental Affairs Promotion Center/Environmental Management Officer
<b>Relevant complaint processing policy</b>	(Corporate Ethics Helpline)
<b>Assessment</b>	Good

**Basic Policy**

The Advantest Group regards the prevention of global warming as an important corporate mission, and makes efforts to reduce greenhouse gas emission by providing green products and reforming its business processes. We are also promoting medium- to long-term energy-saving measures corresponding to the Act on the Rational Use of Energy (Energy Conservation Law) and related regulations.

**Advantest's Achievements in Relation to Carbon Dioxide Emissions in fiscal 2016**

Advantest is working to simultaneously achieve both energy-savings and cost reduction through more efficient production and elimination of waste. In our buildings, we are optimizing air-conditioning and other systems and replacing superannuated equipment with more efficient models, as well as implementing appropriate lighting levels and switching to LED illumination. Advantest's total annual electric power consumption in fiscal 2016 was approximately 560 MWh higher than in the previous year. The main factors behind this decrease were as follows: Mergers and closures of business bases led to an annual decrease of around 800 MWh; increases in production activities led to an annual increase of around 640 MWh at its factories and there was an

annual increase of around 720MWh at development and other sites. A decrease in overtime, increasing efficiency of operations, shortening of the periods for which air condition equipment is in use, and updates to aging equipment led to an annual reduction of around 260MWh and the transition of lighting fixtures to LED lead to an annual reduction of around 40MWh.

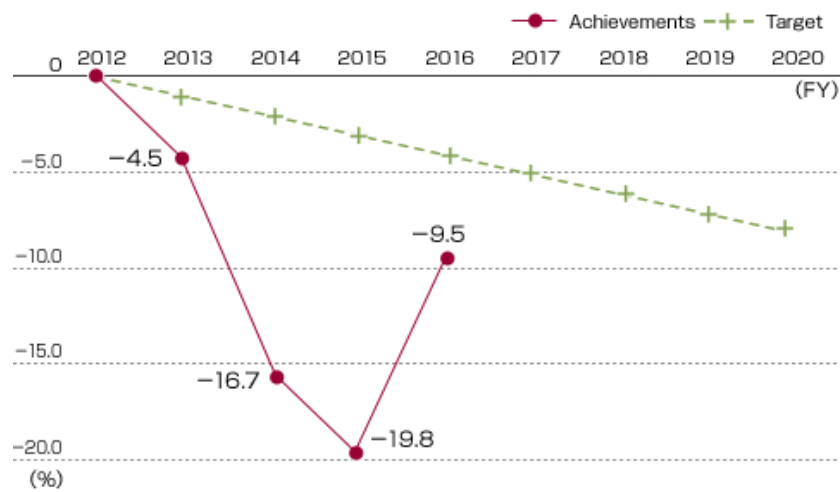

As a result, the rate of improvement in unit energy consumption\* was approximately -9.5% (compared to fiscal 2012).

Advantest will continue its efforts to reduce carbon dioxide emissions by adopting a waste-elimination approach and aiming to achieve both energy-savings and cost reductions.

<p><b>Fiscal 2016</b> <b>Important measures implemented</b></p>	<ul style="list-style-type: none"> <li>● Transition of lighting fixtures to LED (approximate total of 1,400 lights at all business locations)</li> <li>● Optimization of operation hours of air conditioning equipment (all business locations)</li> <li>● Update to high-efficiency compressors (Gunma Factory)</li> </ul>
---	---

\* Rate of improvement in per-unit energy consumption : Introducing energy saving equipment and promoting the efficient utilization of energy, and realizing an annual average improvement of 1% in per-unit energy consumption at Advantest business bases in Japan (Compared to the reference year fiscal 2012, 5% or more reduction in fiscal 2017, 7.73% or more by fiscal 2020)

**Rate of improvement in per-unit energy consumption**

Scope: 8 bases in Japan (including affiliates)

**GHG emissions (Scope 1, 2)**

Scope: 8 bases in Japan (including affiliates)

**Carbon Dioxide Emissions Attributable to Product Delivery (Scope 3-1)**

When delivering its products, Advantest makes use of product packaging and mode of transport that take into account the needs of handling and shock-resistance. Total carbon dioxide emissions deriving from product delivery in fiscal 2016 came to 178 t-CO<sub>2</sub>. The increase in CO<sub>2</sub> emission volume was mainly attributable to changes in final destinations for delivery, with increased delivery distance. In the future, Advantest will continue to monitor the data relating to product delivery, and will calculate the related CO<sub>2</sub> emissions and strive for improvement in this area.

<b>Important measures implemented</b>	<p>Due to the fact that Advantest's products are precision machinery that cannot be transported in ordinary cargo containers and cannot be transported together with other products, Advantest is implementing the following measures:</p> <ul style="list-style-type: none"> <li>● Optimizing of product packaging (cost reduction and packaging size reduction)</li> <li>● Providing training in safe driving and energy-saving driving</li> <li>● Strict enforcement of the requirement that delivery drivers must not allow their engines to idle unnecessarily when stopped for more than a few seconds</li> <li>● Shifting over to the use of hybrid vehicles and vehicles with low fuel consumption</li> </ul>
---------------------------------------	---

**Changes in carbon dioxide emissions attributable to product delivery (Scope 3-1)**

The totals given include: Carbon dioxide emissions deriving from the delivery of products within Japan Delivery to locations specified by customers (such as factories, airports and port facilities, etc.) using special trucks

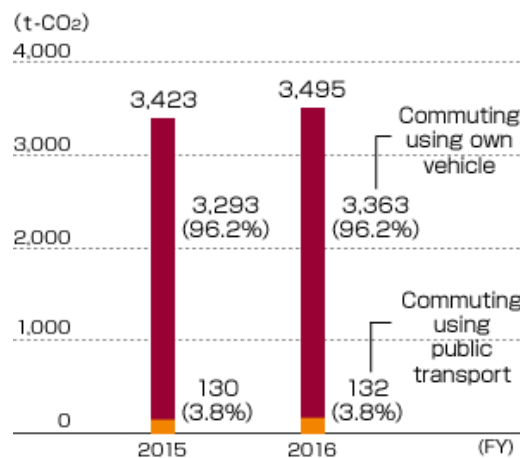

**Carbon Dioxide Emissions Attributable to Product Delivery (Scope 3-2)**

Of the approximately 2,500 Advantest employees (including employees of affiliate companies) in Japan, 85% commute to work using their own vehicles. In fiscal 2016, the total annual carbon dioxide emissions deriving from employees' commuting was 3,495 t-CO<sub>2</sub>.

Advantest will continue to implement measures to discourage drivers from allowing the engine to idle unnecessarily while stopped, through the use of driving safety classes etc.

\* Calculations use the "Emissions Unit Database (Ver. 2.1) for the Calculation of Greenhouse Gas Emissions etc. by Organizations Through the Supply Chain" compiled by the Ministry of the Environment (MOE) and the Ministry of Economy, Trade and Industry (METI).

**Breakdown of carbon dioxide emissions deriving from employee commuting**

**Carbon Dioxide Emissions Attributed to Corporate Vehicles (Scope 3-3)**

Advantest and its affiliates use around 100 corporate vehicles in operations in Japan.

The annual carbon dioxide emissions deriving from operations in fiscal 2016 was 165 t-CO<sub>2</sub>.

In addition, the volume of carbon dioxide emissions increased because all corporate vehicles were consolidated, including corporate vehicles that had not been subject to measurement, in fiscal 2016.

**Changes in carbon dioxide emissions attributed to corporate vehicles**

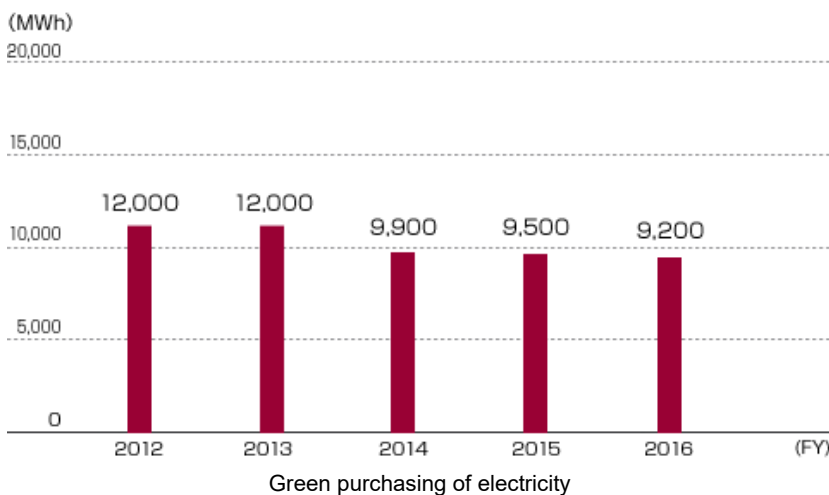

**Measure to Use Solar Panels for Lighting in Employee Parking at Locations in Japan**

LED lights that use power generated by solar panels are employed at the Gunma R&D Center for the lighting at night in employee commuter parking.

**Measuring Relating to the Use of "Green" Power at Overseas Business Locations**

**Purchasing "Green" Electric Power Generated Using Wind Power**

Advantest America, Inc. (AAI) has made a serious commitment to the utilization of renewable energy. To reduce the impact that AAI's use of electric power has on the environment, wind power generation is used to provide electric power equivalent to 100% of that used by AAI's facilities.

Certificate for purchasing "Green" Energy

**Approach for Reducing Energy Consumption**

Advantest America, Inc. (AAI) received a certificate of appreciation from San Jose and the local Pacific Gas and Electric Company (PG&E) for its reductions in energy consumption. AAI participated in the "Step Up and Power Down" energy consumption reduction program launched by San Jose and PG&E in an effort to reduce electricity consumption in the community, and was highly praised for the example it set as a company that promotes energy savings.

Certificate of appreciation

**Installation of Large-Scale Photovoltaic Panels**

Advantest Korea Co., Ltd. (ATK) is promoting a wide range of environmental activities.

At ATK's Cheonan factory, photovoltaic panels have been installed on the roof, with an annual generating capacity of approximately 1,325 MWh; these solar panels contribute to a reduction in carbon dioxide emissions. ATK is also implementing various other measures, including careful sorting of waste and a "No Food Left on Plates Activity" aimed at reducing the amount of food waste generated by ATK's employee cafeterias, by encouraging employees not to leave any leftovers food on their plates.

Photovoltaic panels

Green Products

Sustainability Report 2017

Approach to Materiality in Products and Services

Advantest products generate various small and large environmental impacts through their use. Green products, which reduce environmental impact, are important part for us not only because they address environmental issues but also to appeal quality of our products.

Supervising division	CSR & Environmental Affairs Promotion Office
KPI	Ratio of products that clear our voluntary standards for green products
FY2018 target	100%
FY2016 result	100%
Boundary (scope)	Advantest Corporation (non-consolidated) in Japan
Relevant policies	Advantest Group Environmental Policy
Relevant commitments	Our voluntary standards for green products follow the ISO14021 even though they are not direct compliance targets.
Responsible department/division	CSR & Environmental Affairs Promotion Center/Environmental Management Officer
Relevant complaint processing policy	—
Assessment	Good

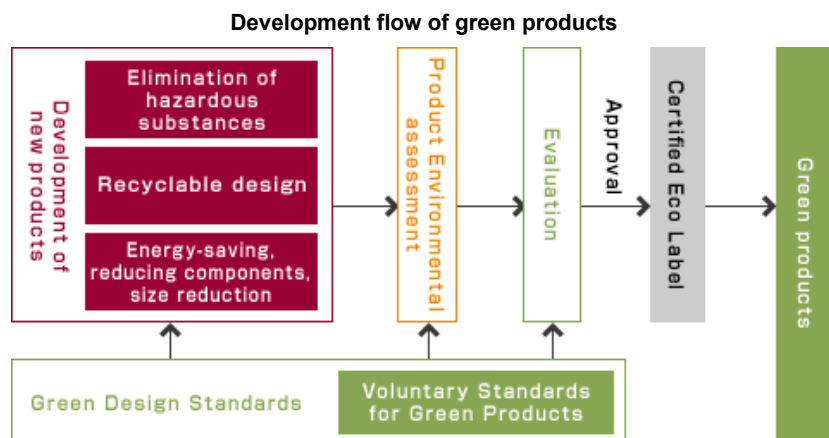

Basic Stance

Contributing to the sustainable development of society and conducting environmentally-friendly business operations are essential issues that need to be addressed in modern business management. The Advantest Group works to develop products from the perspective of environmental conservation while prioritizing high precision and high quality, and certifies as green products those products that are environmentally-friendly in terms of the three key aspects of energy and resource saving, improving recyclability, and elimination of hazardous substances. There is demand in society for the supply of green products because they provide both a reduction in the environmental footprint and an improvement in economic value. The Advantest Group is developing green products in response to these demands and based on the belief that these products will be beneficial for its customers.

Development Flow of Green Products

At the Advantest Group, all new products undergo a product environmental assessment.

During the product environmental assessment, products are assessed from various aspects, including energy-saving, reducing components, size reduction, recyclable design, and elimination of hazardous substances. Products that meet the Voluntary Standards for Green Products defined by Advantest are certified as green products and are awarded with an Eco Label (type II).

**Advantest Group Eco Label**

The Advantest Group Eco Label features an original three-color design representing energy and resource saving, recyclable design, and elimination of hazardous substances through green procurement.

**Energy and Resource Saving**

**Voluntary Standards**

- Energy saving design
- Reducing component design
- Size reduction design

**Recyclable Design**

**Voluntary Standards**

- Design with recyclable plastic materials
- Design for ease of disassembly
- Release of information on disposal

**Elimination of hazardous substances (Green Procurement)**

**Voluntary Standards**

- Improved rates of green procurement
- Elimination of banned substances

**Energy and Resource Saving**

We aim to reduce the environmental impact of our products through product designs with energy savings, reducing components, and size reduction .

**Recyclable Design**

In recyclable design, we release information on parts that will require special attention during disposal, and plastic parts designed in-house use 90% or more recyclable materials. Moreover, we make sure that products are easy to dismantle with standard tools, and we use rechargeable batteries displaying a recycling symbol.

**Elimination of Hazardous Substances (Green Procurement)**

To eliminate hazardous substances from our products, we have established Group standards on banned substances based on the IEC 62474 standard, and we conduct surveys of hazardous substances contained in parts and materials used in our products.

**Green Products Certified during Fiscal 2016**

We supplied the following products, which were certified as green products in fiscal 2016.

- T5830 Memory Test System
- T5851 Memory Test System
- T5851ES Memory Test System
- T5821 Memory Test System
- T2000 AiR SoC Test System
- M6245 X64ATC Test Handler
- Thermal Hand Plug Unit M4871ES
- HA7200 Temperature and Pressure Unit
- Die Level Handler HA1000L

**Reduction rates of fiscal 2016 green products - Examples**

New Product model	Versus previous product	Energy efficiency improvement (%)	Reduction in components rate (%)	Reduction in size rate (%)
T5830	T5781	81	79	81
T5851	T5831	86	88	88
T5851ES	T5831ES	84	88	88
T5821	T5386	32	49	19
T2000 AiR	T2000 GSMF+13TH	84	86	85

Note: The reduction rates given above are the values resulting from the performance conversion.

**Introducing One of Advantest's Green Products**

**T2000 AiR Test System**

Online services for residential and industrial services grow as smartphones and mobile devices become more prevalent. Integrated devices and modules such as System in Package (SiP) that combines multiple functions from communications to power management and sensors into micro controllers and application processes is expected to enter many markets in the future for these services.

T2000 AiR is the optimal small air cooling system for developing these devices and modules as well as for multiple small-volume production. Equipment to supply water for cooling is not required in addition to the small size for storing in the tester connection space of our M48xx-series Test Handler. We are proposing the connections of these handlers as Integrated Zero Test Stations.

The T2000 AiR offers four times the system bus speed through an Enhanced Performance Package (EPP) response compared to the T2000 GSMF to realize 84% less power consumption with comparable performance and 85% more miniaturization.

We also offer a line-up of 15 or more different types of air cooling measurement modules for the T2000 AiR, which contribute to timely market penetration of products for customers. The same software environment is viable as is with the T2000 series' high expandability for measuring multiple devices simultaneously when transitioning to mass production.

T2000 AiR Test System

**Environmental Risk and Chemical Substance Management**

Sustainability Report 2017

**Approach to Materiality in Hazardous Materials**

Advantest recognizes the importance of conducting business partner surveys that include the handling of hazardous materials with the addition and amendments to the RoHS Directive and other electric and electronic laws and regulations.

<b>Supervising division</b>	CSR & Environmental Affairs Promotion Office
<b>KPI</b>	Ratio of business partners that is the target of survey for handling of hazardous materials
<b>FY2018 target</b>	100%
<b>FY2016 result</b>	100%
<b>Boundary (scope)</b>	Advantest Corporation (non-consolidated) in Japan
<b>Relevant policies</b>	Advantest Group Environmental Policy
<b>Relevant commitments</b>	All laws and regulations stipulated in IEC62474
<b>Responsible department/division</b>	CSR & Environmental Affairs Promotion Center/Environmental Management Officer
<b>Relevant complaint processing policy</b>	
<b>Assessment</b>	Good

**Basic Policy for Environmental Risk Management**

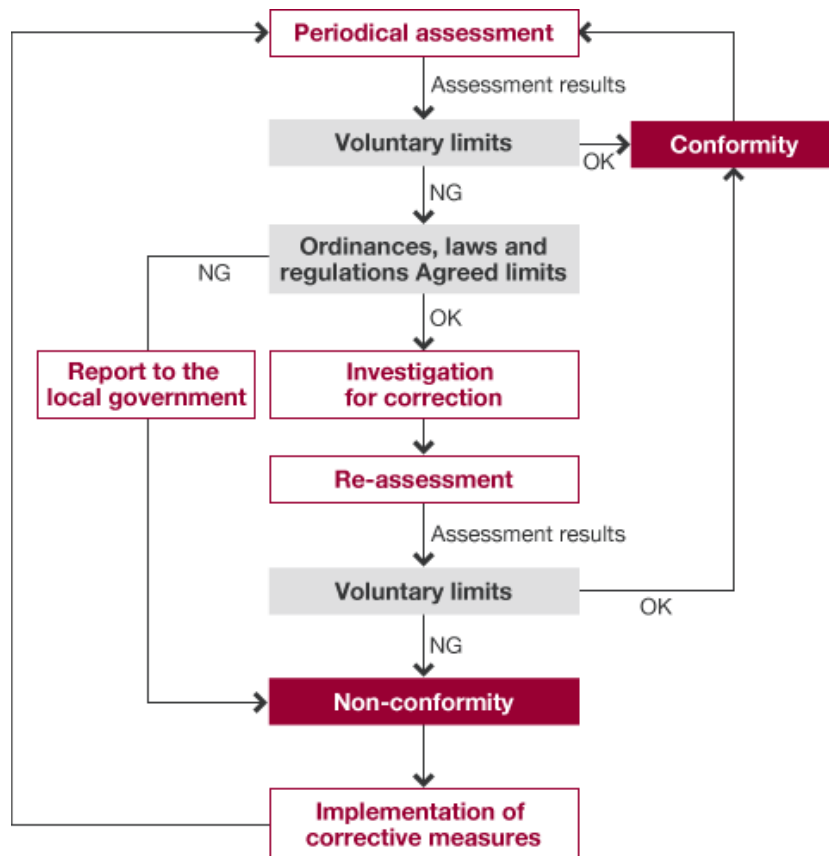

The Advantest Group sets voluntary standards more stringent than prevailing environmental laws and regulations, and implements such standards in the course of operating equipment that could potentially impact the environment, and in monitoring and assessing those operations.

Furthermore, to ensure that we can respond without hesitation should an environment-related incident occur, we have forged rules for addressing such risks, stipulated in documented operating procedures and chemical substance emergency-response procedures and other such guidelines, and have put management systems in place related to those rules.

Moreover, our employees and contractors handling particularly high risk operations regularly take part in specialized training and emergency drills, which are conducted to ensure that they are able to act swiftly in the event of an emergency.

**Business bases compliance management**

**Basic Policy for Chemical Substance Management**

We are working to ensure safety management and compliance with laws and regulations in the use and storage of chemical substances used at Advantest Group business locations.

To this end, we have adopted a chemical substance management system. This system facilitates chemical substance registration, safety reviews, input/output control, and the calculation of data required by relevant laws and regulations, as well as making the material safety data sheets (MSDS) that are necessary for the safe handling of chemical substances available for inspection at any time.

In addition, in order to realize strengthened risk management and chemicals substance management, we are constructing a safety training system, and are conducting audits and providing guidance through the corporate chemical management division to ensure the safety of stored chemical substances, so as to further enhance our safety control system.

Furthermore, we plan to build up our global management system as we strive to achieve the same level of risk management overseas as in Japan.

**Improving Chemical Substance Management: “Aiming for More Precise Management”**

At Advantest Group, we manage the chemical substances that we use by container through our chemical substance management system. Depending on the chemical substances management level specified under the PRTR Law, the Poisonous and Deleterious Substances Control Law, the Occupational Safety and Health Act and other laws and regulations, we establish a classification system of management ranks and set the management method according to each rank, with the aim of having a flexible system.

Strict chemical controls

**Adopt the high-precision management methods in line with the different level of risk posed by different chemical substances**

We implement training in chemical substance handling for Advantest Group employees, ensuring that employees understand how to handle particular types of chemical substances and are aware of the key points to note regarding their use.

Management procedures are simplified for chemical substances that are less hazardous, and autonomous management is implemented with respect to commercially-available sprays, adhesives, etc.

Controls applied to each and every container

Chemical substance control ranks

Rank	Conditions for application	Locked storage	Dispensary control	Inventory checks
4	Chemical substance is extremely toxic or has a profound social impact; registration with national or other government is necessary. Examples: narcotics, stimulants, etc.	Yes	Yes	As required by law
3	Chemical substance is highly toxic; any loss must be reported. Examples: poisons, deleterious substances, etc.	Yes	Yes	Monthly
2	Chemical substance is inflammable, corrosive, or poisonous with prolonged exposure. Examples: organic solvents, acids, alkalis, etc.	Yes	Yes	Twice annually
1	Chemical substance is not very harmful, but due to the large amounts used, control is necessary. Examples: solder paste, Fluorinert, etc.	No	Yes	Twice annually
0	Chemical substance is not very harmful and does not warrant special control. Examples: some adhesives, grease, lubricants, paint, lead-free solder, wire solder, bar solder, sprays (spray oil, cooling spray), etc.	No	No	No

In line with this management approach, proper after-use treatment will be followed, such as making a request to a waste treatment company.

PRTR Data

Implementation of General and Specialist Chemical Substance e-learning Education

We carry out general chemical substance education for employees, with the aim of making participants aware of the possibility of accidents or environmental pollution through mishandling even of everyday chemicals, and ensuring that they understand ways of reducing these risks. For employees who use chemical substances every day, we conduct a more practical specialist education every year through e-learning, from the perspective of awareness of dangers and safe handling.

Materials used in training on chemical substances

In this program we explain things simply, using examples of accidents, regarding chemical substances regulated under the main laws such as poisons, deleterious substances, organic solvents, specific chemical substances, hazardous materials covered by the Fire Services Act, etc.

In fiscal 2016 we conducted general education for all new employees and specialist training for 518 employees who handle chemical substances.

<Content>

- The danger of chemical substances (effects on the human body)
- The importance of safety training for chemical handlers
- The importance of wearing personal protective equipment (gloves, goggles, masks, etc.)
- Points to be observed according to the requirements of the law  
Special medical diagnosis, selection of a work leader, environmental measurement, inspection of ventilation equipment, notification of designated hazardous materials specified under the Fire Services Act, etc.

Recycling Resources

Sustainability Report 2017

Approach to Materiality in Drainage and Waste

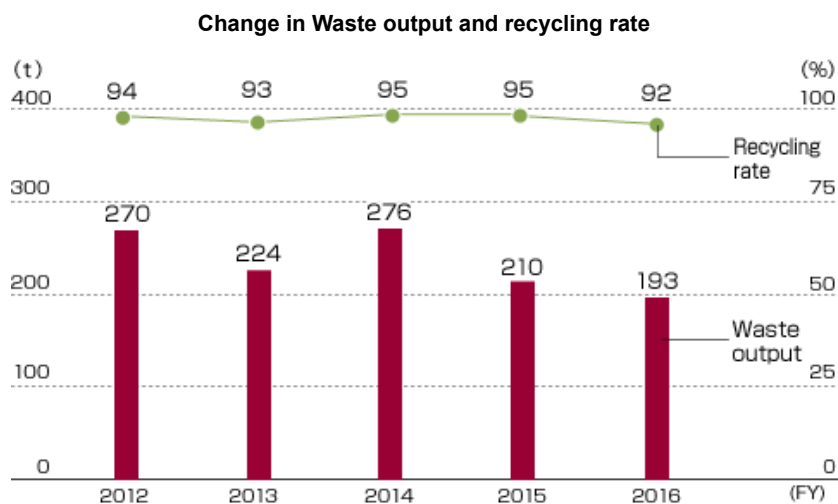

Advantest promotes 3R for resources based on the belief that contributing to a recycle-oriented society is one part of corporate social responsibility, and it positions measures for drainage and waste as an important issue.

Supervising division	CSR & Environmental Affairs Promotion Office
KPI	Waste recycling rate
FY2018 target	To promote resource recycling and sustain a waste recycling rate of more than 90% at locations in Japan
FY2016 result	92%
Boundary (scope)	Advantest Group (Japan)
Relevant policies	Advantest Group Environmental Policy
Relevant commitments	Waste Management and Public Cleansing Act
Responsible department/division	CSR & Environmental Affairs Promotion Center/Environmental Management Officer
Relevant complaint processing policy	(Corporate Ethics Helpline)
Assessment	Good

Basic Policy

The Advantest Group pursues operations encompassing the "3(three) Rs" (reduce, reuse, and recycle) with the aim of realizing a recycling society.

In addition, the Group is building up its parts-separation initiatives that were initially launched in fiscal 2009, pursuing efforts to recover valuable materials from waste in a manner that fully complies with all relevant laws and regulations, and conducting proper management and disposal of waste generated in the course of business operations.

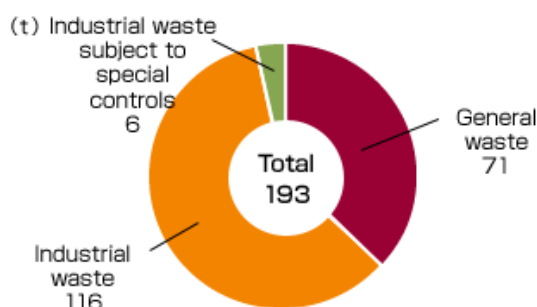

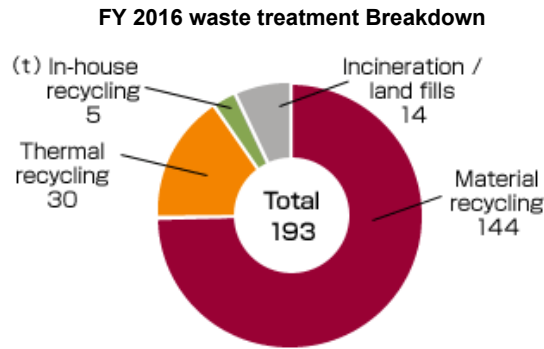

Scope of waste data: Advantest Group (business locations in Japan)

\*Modified recycling rate

The calculation method used has been modified retroactively in line with the changes in recycling methods for general waste.

Breakdown of waste types in FY 2016

**Disposal of Equipment Containing PCB**

We had owned three condensers, florescent lighting/stabilizers and five transformers that were devices that contained polychlorinated biphenyl (PCB), but these were properly disposed of at a detoxification treatment facility certified by the Minister of the Environment in June 2016.

In August 2016, we completed our packing registration for florescent lighting and stabilizers that contain a high concentration of PCB (278.6 kg) with the Japan Environmental Storage & Safety Corporation (JESCO).

In the future, we will further the disposal of three condensers as well as florescent lighting and stabilizers already registered through the Environmental Storage & Safety Corporation.

**Memoranda of Understanding (MOUs) Entered into with Waste Disposal Service Providers Stipulating Exclusion of Antisocial Forces**

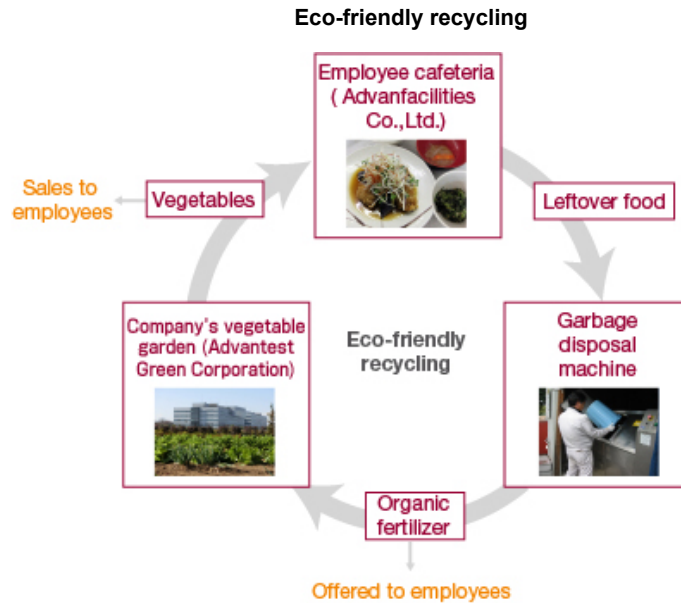

Companies have been imposing written obligations stipulating that contractual relationships may be terminated if the counterparty is found to be an anti-social organization. This is premised on ordinances established by the Tokyo Metropolitan Government and other municipalities calling for the elimination of crime syndicates

Moreover, the Japan Business Federation (Keidanren), in calling on companies to overhaul their corporate behavior, is recommending that they conclude such written agreements as one means of ridding society of anti-social forces.

In accordance with ordinances calling for the exclusion of criminal elements and in line with recommendations of Keidanren in that regard, the Advantest Group’s compliance initiatives entail concluding Memoranda of Understanding with all waste disposal service providers involved in our business dealings, stipulating that contractual relations may be terminated if it is discovered that a business partner acts as an anti-social organization.

**Eco-friendly Recycling in Employee Cafeteria**

We recycle the leftover food generated by the Advantest Gunma R&D Center’s employee cafeteria. The leftovers are processed into compost. Some of the compost is then used to fertilize an onsite vegetable garden, and some is distributed to employees at no cost. Produce from the garden is used in meal preparation at the cafeteria. Also, used cooking oil goes to a recycling business, where it is processed into biodiesel fuel for reuse.

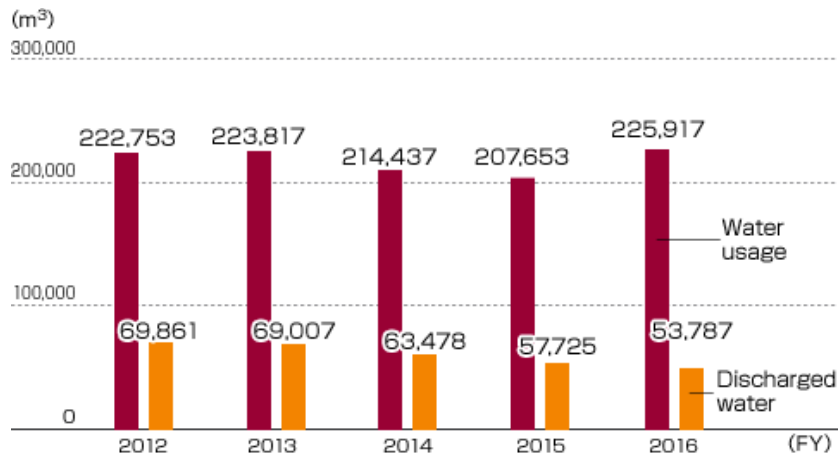

**Effective Use of Water Resources**

Advantest's main water resource use applications are the operation of air conditioners, kitchen use, toilet cleaning, and drinking. At our main bases we use water for industrial use efficiently. In addition to using this water for cleaning the toilets, we also use it with roof-mounted sprinklers to improve cooling in the summer. (It should be noted that approximately 90% of the discharged water produced by Advantest Group is classed as domestic sewage; currently, domestic sewage cannot be recycled)

Advantest's development and manufacturing sites in Japan are located in Gunma Prefecture and Saitama Prefecture and use water resources from the Tonegawa River. In order to protect the Tonegawa River's water resources we carry out forest protection activities in the Kusatsu-machi National forest in Gunma Prefecture, the source of the river.

Of course, every member of our staff takes care not to waste water, and strives to make effective use of water resources.

**Trend in water usage/discharged water**

**Amount of Tonegawa River water system usage**

**Product Recycling**

Sustainability Report 2017

**Basic Stance**

It is the Advantest Group's basic policy to take active steps to ensure that the products we sell are reused and recycled after they are retired, and to buy back products that are not expected to be reused so that the resources can be recycled.

**Recycling policy**

1. Realize 100% collection of recyclables through manual disassembly.
2. Make clear to whom recycling is to be commissioned, and secure traceability.
3. Promote the conservation of the global environment in collaboration with customers.
4. Properly dispose of harmful substances (Hazardous substances: mercury relay, ion type smoke sensor, internal cooling water, Fluorinert)

**Fiscal 2016 Results**

During fiscal 2016, the Group recycled 5 retired products for a total of approximately 48 tons of recycled resources, achieving 98% collection of recyclables. In addition, the Group has established recycling traceability for each discarded product. This was made possible through the cooperation of customers, intermediaries, and waste disposal businesses across the country. We will further improve work efficiency, reduce the burden on customers, and encourage environmental preservation.

**Product Recycling Flow**

**Initiatives With Business Partners**

Sustainability Report 2017

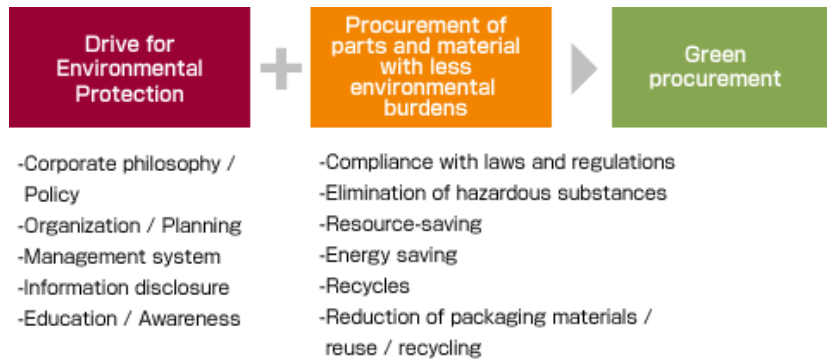

**Green Procurement / Initiatives Related to Regulations for Chemical Substances Contained in Products**

At Advantest we are striving to eliminate hazardous substances across our manufacturing activities including suppliers of components and assembly and processing partner companies, and wish to connect this to the development of green products. We engage in communication with our business partners, and formulated the Advantest Green Procurement Guidelines in fiscal 2002 to facilitate this process. We operate according to these guidelines in order to give consideration to the environmental aspects in addition to quality, cost, and delivery throughout the whole process of production, including the purchasing of the components and materials that are used for our products. In fiscal 2016 we explained the Guidelines to all business partners, including new accounts, and requested their cooperation.

We have created a database from the environmental information we received from our suppliers, and are utilizing it to promote eco-friendly product manufacturing, along with the implementation of product environmental assessments.

▶ [Advantest Green Procurement Guidelines](#) (PDF: 169KB)

**The Principles of the Green Procurement**

**Component Registration in Green Procurement**

Regarding component registration, we are conducting environmental research of the procured components, with the cooperation of our suppliers. We investigate the components to find out if they contain chemical substances that can burden the environment, and promote green procurement initiatives to reduce environmental impact.

**Banned and Restricted Substances**

Advantest specifies the chemical substances that are prohibited from inclusion in our products or otherwise subject to restriction based on the IEC 62474\* standard.

\*IEC62474 : Material Declaration for Products of and for the Electro technical Industry  
 (See <http://std.iec.ch/iec62474>)

**Survey of Suppliers on Hazardous Substances**

Starting with the RoHS Directive, there have recently been additions and revisions of electrical and electronic regulations. On 1st October 2014, Advantest, in line with the revised IEC62474, revised its questionnaire on hazardous substances and informed our business partners.

**Biodiversity**

Sustainability Report 2017

**The Advantest Group's Guidelines of Action for Biodiversity**

To show our gratitude for the gift of nature that is endowed by biodiversity, and to recognize the significance of biodiversity in underpinning the prosperity and the wellness of our society, the Advantest Group will carry out initiatives in conserving biodiversity and in contributing to the sustainable use of biological resources.

**1. Understanding Environmental Impact**

We identify, evaluate and share information on any aspects that may have a significant impact on biodiversity in the entire lifecycle of our business activities.

**2. Understanding Biodiversity**

We increase awareness and understanding of biodiversity among all employees so that they are able to engage in activities that give consideration to biodiversity in their business activities and daily lives.

**3. Reduction of Environmental Impact**

By seeking highly effective measures, and by carrying them out continuously, we reduce the impact of our business activities on biodiversity.

**4. Cooperation with Stakeholders**

We cooperate with a variety of stakeholders such as the government, educational organizations, NPOs, local residents and our business partners to promote activities related to the conservation of biodiversity.

**Biotope**

Reflecting our commitment to living in harmony with nature, in 2001 Advantest established a biotope eco-park in Gunma R&D Center, with the aim of helping to recreate the original, natural landscape of the Kanto Plain, a landscape that is being lost to development; this biotope is the largest of its kind established by any private-sector company in Japan.

Advantest's biotope provides a venue in which Advantest employees can learn about the importance of protecting the global environment; the biotope is also used as a means of fostering communication with local residents.

\* Biotope: "Biotope" is an English loanword deriving from the German word "biotope" (life) and "topos" (place).

▶ [Advantest's biotope](#)

**Hold Nature Observation Events in the Biotope**

Since 2005, Advantest has been holding nature observation events for elementary schools located near its sites, using the biotope as a venue for communicating with surrounding communities. Participants in these events learn what kinds of plants and animals live in the biotope by conducting a search. They also fish for crayfish to reduce the number of introduced species such as American crayfish, which encourages them to consider the importance of biodiversity. Every year, about 150 children and teachers/guardians from two neighboring schools take part in our nature observation event. We plan to continue this activity, making it a centerpiece of cooperation with the community.

**Conservation Activity to Protect Japanese Red Pine Trees at the Advantest Laboratories**

Within the grounds of the Advantest Laboratories Ltd. facility (in Sendai City, Japan), there are approximately 80 naturally-growing Japanese red pine trees, which are about 100 years old and grow to a height of around 30 meters. This Japanese red pine grove was designated a Protected Forest by Sendai City Government in 2007. To help ensure the maintenance of a rich natural environment, Advantest is working to conserve these Japanese red pine trees and the creatures that live in and around them.

**“Kusatsu Therapy Forest” Forest Conservation Activity**

Every year since 2007, Advantest has been implementing the “Kusatsu Therapy Forest” State-owned Forest Conservation Activity in Gunma Prefecture. Besides providing an opportunity to strengthen Advantest employees’ awareness of the importance of environmental activities, this activity also contributes to preventing forests from becoming degraded, conserving water resources, and enhancing forests’ ability to sequester carbon dioxide.

**Tropical Rainforest Conservation Activity in Malaysia (Borneo)**

To mark the 50th anniversary of the company’s founding, in 2005 – 2008 Advantest implemented a Dipterocarp hardwood tree reforestation activity aimed at helping to regenerate tropical rain forest. Since 2009, Advantest has continued to assist with maintenance management, including surveys of plant growth status, undergrowth control, etc. in collaboration with the Sabah Forestry Development Authority (SAFODA) of Sabah State (Malaysia).

**Environmental Accounting Results**

Sustainability Report 2017

**Japan**

Scope: 8 domestic bases (including affiliated companies) Period: April 2016 to March 2017

Unit: ¥1,000

Category	Major activities	Capital investment		Costs

## Advantest's Statement on the EU-RoHS Directive

Sustainability Report 2017

In complying with environmental laws and regulations, the Advantest Group is working toward eliminating the use of hazardous materials while also pursuing environmental conservation efforts that entail reducing consumption of energy and resources. More specifically, we have been working with our suppliers since September 2003 on initiatives to investigate and eliminate the use of restricted hazardous materials.

We are in compliance with the European RoHS Directive\*.

Advantest's semiconductor testers and handlers are classified as Large-Scale Stationary Industrial Tools (LSSIT) under the EU-RoHS directive, and as such are exempt from the directive's provisions. Nevertheless, on the basis of our commitment to environmental conservation, we continue working toward further elimination of hazardous substances from these product lines.

\* Certain exemptions aside, the European Union Directive 2011/65/EU on the restriction of the use of certain hazardous substances (RoHS) in electrical and electronic equipment and respective revisions currently restrict the use of six substances in such products:

- Lead (Pb)
- Hexavalent chromium (Cr VI)
- Mercury (Hg)
- Polybrominated biphenyl (PBB)
- Cadmium (Cd)
- Polybrominated diphenyl ether (PBDE)

**Management Approach**

Sustainability Report 2017

**Basic Stance**

As a member of civil society, Advantest is supported by a wide range of stakeholders, including customers, shareholders, suppliers, employees, the local communities in the vicinity of the company’s business locations, etc. Advantest bears social responsibility towards all of these stakeholders.

Recognizing this responsibility, we implement various measures based on identified materiality aspects relating to occupational health and safety, compliance, etc.

**Identified Materiality Aspects and KPIs, and Targets for FY2018**

Materiality Aspect	KPI	Measures implemented
Conflict minerals	Continuing efforts to use materials where the risk that said minerals have been produced using conflict minerals is low, by asking business partners to ensure transparency in regard to the sources of materials and components, etc., and by working together with industry organizations and business partners to investigate information relating to conflict minerals (i.e. mineral processing firm information).	<a href="#">Procurement Practices</a>
Employment	Percentage of employees returning to work after taking childbirth and/or childcare leave	<a href="#">Employment and Diversity</a>
Occupational health and safety	Occupational accident rate in Japan (frequency rate)	<a href="#">Occupational Health and Safety</a>
Training and education	Average number of hours of training per employee per year	<a href="#">Human Resources Development, Fair Evaluation and Treatment</a>
Diversity and equal opportunity	Female employees as percentage of total workforce	<a href="#">Employment and Diversity</a>

Compliance	Number of non-compliance relating to products/services	<a href="#">Product Liability</a>

### **Looking Ahead to the Future**

We started specific activities in fiscal 2016 for the materiality, KPI items and targets designated in the framework recommended in The GRI Sustainability Reporting Guidelines 4th Edition from fiscal 2015.

We will further our activities to achieve our targets by continuing the PDCA cycle based on these guidelines in fiscal 2017.

## Employment and Diversity

### Human Resources Basic Philosophy

We treat our employees — each one an important asset — with respect and fairness. We also support our employees' diverse lifestyles and individual development, and we are committed to having them grow along with the Company. To protect these valuable assets and increase their value, we drafted our Human Resources Basic Philosophy in September 2000. This document supports proactive human resource development with consideration for fairness and soundness.

#### Advantest's Human Resources Basic Philosophy

At Advantest, we consider our employees to be indispensable business assets. We have established the following philosophy that underpins our personnel-related policies, and we are constantly working towards the realization of this philosophy.

##### 1. Focusing on results

We promote a human resources system that values and emphasizes fair treatment of employees who exhibit a can-do spirit with which they overcome challenges and achieve outstanding results.

**2. Taking into consideration the needs of fairness and soundness**

We take constant care to ensure that all of our policies and systems are objective, fair, and sound, so that we can achieve the biggest and best results with our employees as a result.

**3. Pro-actively supporting human resources development**

We actively support personnel that strive for self-development through persistent hard work in order to acquire advanced specialist knowledge and a broader education.

**Diversity and Equal Opportunity**

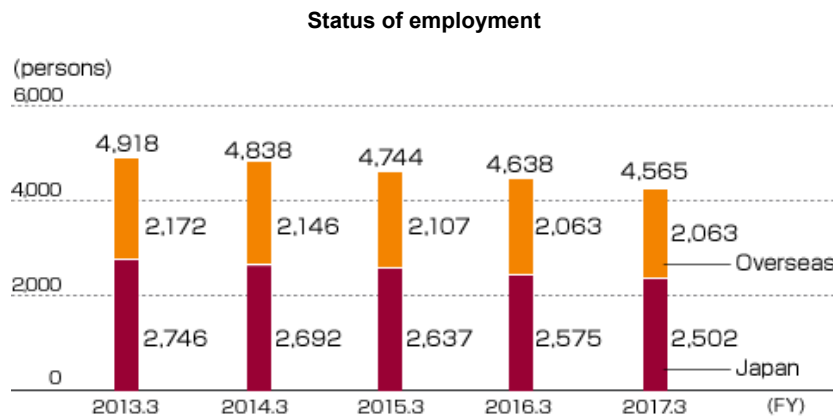

**Diversity Management**

Advantest accepts the diversity of its workforce and strives to create a workplace where every employee can achieve their potential and participate to the fullest. As stipulated in the Advantest Code of Conduct, we respect human rights and are determined to eliminate discrimination on the basis of race, creed, gender, nationality, religion, or physical disabilities.

**Status of Employment**

The Advantest Group pledges in its basic policy to respect the human rights of every employee and eliminate all forms of discrimination on the grounds of race, creed, gender, nationality, religion, physical disability, etc. Moreover, we are eliminating discrimination from recruitment and employee compensation practices, and striving to hire, cultivate, and promote personnel who will shine on the global stage.

The changes in the number of Advantest Group employees have been as follows.

**Employee gender and female employees' share of job categories**

	Male	Female	Total	Female employees as % of total
<b>Total</b>	3,793	772	4,565	16.9%

## Recruitment and Use of Global Human Resources

Advantest's business has become more global in recent years, and we aim to secure personnel who understand other cultures, have high-level communication skills, and can see business through on the global stage. As the business environment becomes more borderless, it is increasingly necessary to use personnel exchanges with overseas affiliates to promote globalism in our human resources development and corporate structure.

We are putting more effort into hiring foreign students both overseas and in Japan in order to secure employees who can fulfill missions on the global stage. We continue to conduct personnel exchanges with overseas affiliates as a way of giving employees business experience in a global environment. Through everyday business and training in both organizations, technology and know-how are shared, allowing each employee to learn more advanced technology plus adaptive skills for a diverse business environment.

The human resources exchanges with overseas affiliates are implemented frequently at each division regardless of the type of job. Under this program, which is specifically designed to promote interaction among personnel in Japan and abroad, employees participate in the exchange either on a short-term or long-term basis.

These activities have enabled us to recruit a large number of foreign students studying in Japan. We now plan to extend the global reach of our recruitment activities going forward, through participation in events aimed at students studying overseas, etc. Although new employee training is generally geared toward new graduates who join the company in April, we are modifying this to allow all new graduates to take part in the training irrespective of when they start work.

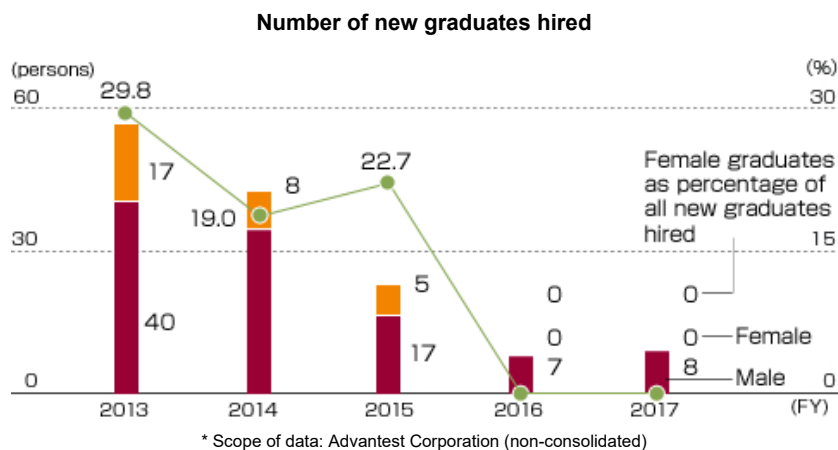

As of March 2017, Advantest Corporation (non-consolidated), counted employees from 10 countries in its workforce, and eight of the Company's 22 executive officers were non-Japanese. We will continue to provide equal opportunities to all promising individuals regardless of nationality while underscoring the need to develop global personnel and global organizations through borderless promotion and personnel exchange.

### Promotion and Utilization of Female Employees

We believe in always accepting diverse values and that there is a need to continue to promote change in the corporate culture to encourage active participation regardless of gender, age and nationality. However, as of March 2017 only 13.5% of overall employees and 1.8% of management are women and so expanding the employment of women is a key challenge for use. With the coming into effect of the Act Concerning Promotion of Women's Career Activities, recognizing the importance of ensuring that employees do not work excessively long overtime hours, Advantest is implementing an action plan aimed at: (1) Bringing the number of people who work excessively long overtime hours (defined as working over 80 hours a week) over the course of a year down to zero; (2) Keeping monthly overtime hours within 30 hours.

At Advantest we hire mainly engineering students where there is a high ratio of men to women, and women were not motivated to take the entrance exam through our conventional recruitment activities. Given this situation we focused on demonstrating the benefits of our company to female engineers and strengthening our appeal to women. We make a special effort to use young female employees during laboratory visits and business facility tours, thereby reducing the distance between us and the female applicants, and we emphasize the activities of female employees in our website and hiring brochure. In addition, at employment events, we explain our systems and career plans for women and describe how Advantest's female employees play an active role in the company.

Despite these efforts, we were not able to recruit a new female employee partly because we had lowered the number of new hiring in fiscal 2017. Advantest will continue to focus our efforts to increase the ratio of female employees in the future.

### Active Use of Older Employees

Since April 2006, when the age at which national pensions are awarded was raised, it has been mandatory to take steps toward employing older workers up to the age of 65. Accompanying this change, Advantest has revised its re-employment system for older individuals and is responding flexibly to older persons' desire for employment. Our re-employment activities entail deciding on the employment packages and job postings most suitable for actively taking advantage of the skills and know-how possessed by older adults.

**Change in users of the re-employment system**

\* Scope of data: Advantest Corporation (non-consolidated)

The data includes only new users of the re-employment system.  
(Persons who used the system in previous years are not counted)

**Employment of People with Disabilities**

Advantest Green Corporation (AGC) was established in September 2004 as a special subsidiary of Advantest for the purpose of promoting the employment of people with disabilities. Since then, AGC has been striving to offer job opportunities for, and continuous employment of, people with disabilities under the slogan, "Support employee independence and achieve social growth in partnership with the local community."

We provide AGC employees with a pleasant working environment in operations such as landscaping, cleaning, reception duties, selling bread, deliveries, and the management of dormitories. Advantest also actively takes part in various activities in partnership with local communities and relevant organizations to create workplaces where all employees, regardless of their disability status, can work comfortably.

To expand employment opportunities for the disabled, we are taking steps to make the workplace environment more conducive to their needs by, for example, standardizing work procedures, introducing equipment replenishment systems, and taking other initiatives to streamline tasks. We are also considering moves into new job categories, bringing vocational trainees on board, holding on-site workshops, and otherwise pursuing initiatives that will carry over to new employment.

**Change in employment rate of people with disabilities**

\* Scope of data: Advantest Group (Japan)

## Supporting Diverse Working Styles

Sustainability Report 2017

### Ensuring a Good Work-Life Balance

Advantest supports its employees in their pursuit of a good work-life balance based on Japan's Act on Advancement of Measures to Support Raising Next-Generation Children. We believe that the work-life balance concept will help make the company a comfortable place to work for all employees, and will ultimately contribute to increasing our corporate value. We are therefore taking measures to reduce overtime hours and create a work environment that facilitates a good work-life balance, allowing our employees to actively pursue outside interests and become well-rounded individuals.

### Arranging a Balanced Support System for Work and Family

Advantest has implemented a variety of measures so that all employees, while maximizing their potential, can balance work and family (also partially includes non-regular employees).

Pregnant employees can receive 100% compensation during pregnancy visits and pregnancy complications leave (introduced in April 2007) and employees who work while caring for children can take up to approximately 2 years of childcare leave (introduced in April 2001). Also, employees with children up to the 3rd grade can choose shorter working hours.

It should be noted that re-employment following childcare leave was 100% in fiscal 2016.

We plan to complete standardized facilities for work-life balance, publicize the system and continue to make improvements while confirming the status of usage.

Number of staff using childcare leave

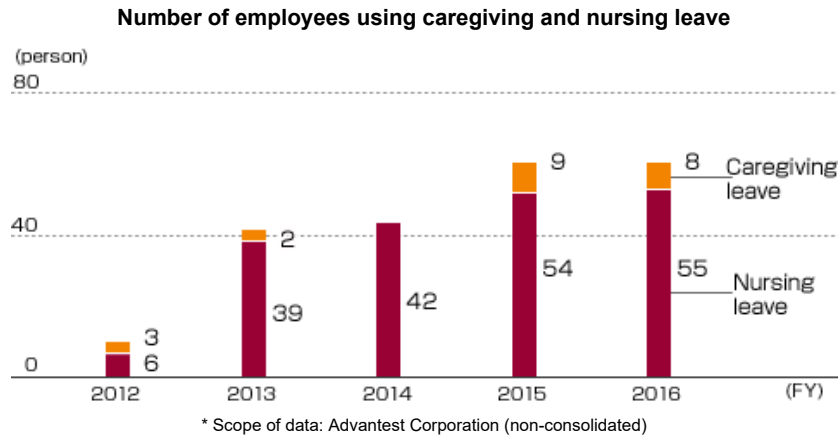

\* Scope of data: Advantest Corporation (non-consolidated)

Number of employees using childcare shorter working hours

\* Scope of data: Advantest Corporation (non-consolidated)

In 2007, we placed the Work-Life Balance Support Guide on the company intranet to spread awareness of the various programs that Advantest provides and encourage take-up. The guide also offers information on related services provided by local governments.

The Work-Life Balance Support Guide

## Reducing Overtime Hours

The most important issue regarding work-life balance is the reduction of overtime hours. To address this issue, we set the goals specified below and then focused on increasing operational efficiency, encouraging a change in employee mindsets, and making the most of available work arrangements such as flextime and shift work.

### Our overtime reduction goals are:

1. Number of employees with monthly overtime of 80 hours or more: zero
2. Average monthly overtime hours: 9 or fewer (excluding discretionary labor)

We have also made start and finish times more flexible and introduced half-day leave slots to make it easier for employees with working spouses to adjust their work schedules so that they can better share household chores and responsibilities.

In fiscal 2016, we have been sincere in our ongoing efforts to reduce the amount of overtime, and we are incorporating the targets of the Act on Promotion of Women's Participation in Their Working Lives for reducing long working hours while raising awareness on our corporate intranet. Since fiscal 2011, we have made announcements via the public address system urging employees to leave the office on time on Wednesday, and we have been notifying the immediate supervisors of employees found to be working excessive overtime (15 or more hours of overtime already clocked by the 15th of the month, or 70 or more hours by the 20th and 25th of the month, or three days of holiday worked already by the 20th and 25th). In the second half of fiscal 2014, we began issuing notices to supervisors when employees clocked four or more hours of overtime by the 10th of the month, or seven or more hours by the 20th of the month, in an effort to further reduce overtime hours.

Although we were able to achieve our goal of zero employees working 80 or more monthly overtime hours in fiscal 2016 as a result of these initiatives, we were not able to achieve our goal of fewer than average monthly overtime of 9 hours. The reason was that we had to deal with unexpected problems, handle increased production, and meet short lead times.

The overtime hours per person for fiscal 2016 was 9.2 hours as of February 2017.

**Average overtime hours worked per person**

**Number of employees taking accumulated holiday**

Human Resources Development , Fair Evaluation and Treatment

Sustainability Report 2017

Approach to Materiality in Training and Development

Every employee clearly understands their role and need to enhance their individual skills in order to improve corporate value. We recognize training and development as an important CSR theme based on these needs.

Supervising division	Human Resources Department
KPI	Average annual training hours for each employee
FY2018 target	To enhance training reflected in the character of every employee who joins the company each year and the policies of society as a way to cultivate the fundamental skills of junior employees.
FY2016 result	Training hours: 12,249h; 2,245 per AT (including provisional training); Average 5.5h
Boundary (scope)	Advantest Corporation (non-consolidated) in Japan
Relevant policies	Human Resource Development Policy
Relevant commitments	-
Responsible department/division	Human Resources Department
Relevant complaint processing policy	Handled based on surveys conducted after training is held
Assessment	△

The Human Resource Development Policy

To enhance corporate value, we need to ensure that employees clearly understand their role and make the effort to develop their capabilities. We expect our employees to show initiative with respect to refining their skills, and at the same time we encourage them to effectively leverage their respective strengths in the global business arena as part of our team.

Moreover, exceptional management ability to harness combined group capabilities plays a crucial role in our turning innovative ideas into products and delivering them to the market.

Our human resources development efforts are based on the three policies outlined in the illustration below, in line with the Human Resource Development Policy established in April 2003.

Focusing on the three policies of developing an adventurous spirit among our workers, providing our workers with a cosmopolitan outlook, and upgrading management skills, we conduct human resources development to produce a professional workforce capable of navigating the global business environment. Through this policy, Advantest actively supports employees who work consistently to refine their skills, acquire greater expertise, and broaden their knowledge.

**Education and Training System and Implementation Status**

Advantest has prepared a training program that anyone can participate in, and where a wide range of topics can be learned, from basic knowledge up to the latest technology trends. In addition, to ensure that this training program adapts to the changing environment, we continue to consider further improvements.

With the development of globalization, in order to adapt to the changes in the wider business environment, we worked to develop a human resources education system in line with the above-mentioned human resource development policy. To make this training even more effective, we are forging and implementing new programs, including the expansion of our global training program. New programs will be delivered by specialists to make them more effective, and we will selectively use in-house or external lecturers depending on the program content.

We plan to restructure our education system by factoring in opinions from overseas as well as those from Japan, thus giving it a more global perspective.

In fiscal 2016, a total of 1,686 employees received training of some kind, and the average number of training hours per employees was 5.5 hours for 12,249 hours of total lesson time. (These figures exclude initial training for new employees )

Training category	Target	Number of trainees	Lesson time (hours)
Career Training	Managers, General employees	175	2,625
Business Training	Managers, General employees	317	3,044
Technical Training	Managers, General employees	355	1,896
e-learning	Managers	17	850
English	Managers, General employees	69	1,656
External Seminars	Managers, General employees	224	1,120
TOEIC	Managers, General employees	529	1,058
Total		1,686	12,249

**Development of Engineers**

We place particular emphasis on educating engineers, with the aim of ensuring that our products continue to underpin leading-edge technologies.

We have created a training program accessible to every employee of the Group and covering a wide range of subjects, from basic knowledge to the latest technologies.

In fiscal 2016, approximately 292 engineers participated in the various technology seminars that were provided. The program now includes seminars hosted by Advantest’s senior engineers. For example, one of the seminars featured a lecture on design quality by an employee in charge of design, thereby shedding light on the basic technologies required to maintain and improve product quality based on the speaker’s first-hand experiences. The program acts as a means of imparting not only technical knowledge but also Advantest’s “corporate DNA” to successive generations.

**New Employee Education and Training**

Advantest’s training program for new employees starts with three weeks basic business training covering the basics of working life. After that, the new recruits are put into one of two occupation-specific training regimes, depending on whether they have been hired for engineering or administrative job assignments.

Engineering employees undergo “basic technology training” to learn the basic knowledge required, starting with the basics of design and then the methods for using products, quality assurance, and intellectual property etc., and go on to learn the necessary skills as Advantest engineers through “manufacturing training” to learn the necessary skills as an Advantest engineer through “practical development training” that offers hands-on experience in development and launch of new product production. New administrative employees do training in the three fields of sales, production, and management, to get an overview of the Group’s business and how the divisions are interrelated.

By having new employees experience various areas of company operations in this way, we are able to ensure that they will clearly understand their own roles, and will recognize the importance of teamwork with other divisions. Our training period for new recruits acts as a key formative phase in their professional development as Advantest employees.

**New employees training**

	April	End of September	
<b>Engineering roles</b>	<b>Basic business training (3 weeks)</b>	<b>Basic engineering training (2 months)</b> - Device measurement training - Quality assurance training - Intellectual property training - Screw fastening, soldering, etc.	<b>Manufacturing training (3 weeks)</b>
<b>Administrative roles</b>		<b>Department exercises (5.5 months)</b> - Sales training - Manufacturing training - Management training	

**Fair Evaluation and Treatment**

We evaluate and develop career of the employees by reflecting with the goals set at the beginning of the period, communicating with superiors during the period as necessary, and evaluation interview at the end of the year. This interview is carried out for regular employees and part of contract and temporary staff.

**The Advantest Resource Management System (ARMS)**

At present, our overseas sales ratio is over 90%, and among our 4,638 employees, more than 40% (2,063) are in overseas affiliated companies, making Advantest a global company. Given this structure, we introduced the Advantest Resource Management System (ARMS), a unified human resources system, in April 2012. ARMS promotes cooperation among multiple bases around the world, as well as smooth personnel exchanges and transfers.

**Global human resource system**

Under ARMS, the unique job classification systems decided on by Group companies in each country have been replaced by a new 10-level job system that is common to all. In this system, job levels 1 to 6 are for general employees, while levels 7 to 10 designate management positions. There are two management paths in this system: one for “people managers”, who manage budgets and deal with staff merit and labor issues, and one for “functional managers”, who tend to business and ensure that

operations are carried out properly. Line managers with subordinates are assigned to the first path, and all other specialists are assigned to the second. With these two lines for advancement, we ensure that diverse personnel have opportunities to develop as managers.

We also apply common global rules to our pay scale, including basic pay and bonuses. Previously, for example, bonus payments in each country mainly reflected the performance of Advantest’s subsidiary or affiliate in that country, but under the new system bonus payments reflect the Company’s consolidated earnings. Starting in fiscal 2012, we have applied a new system of evaluating employee performance. No matter where Advantest employees work, they can now be evaluated and rewarded according to a common global system, with every employee receiving an evaluation/cultivation interview at least once a year.

Five years have passed since we introduced our global human resources system, during which time efforts have been made to increase the number of employees seconded from Japan to overseas postings and the number of personnel exchanges with overseas affiliates; this system has contributed to invigorating the organization and improving corporate performance.

**Global job level and title**

Job Level	Job Title		Descriptions		
1	Entry		Performs routine tasks of a repetitive nature in a...		
2	Career		Duties and responsibilities focused on structured and...		
3	Associate		Requires specific knowledge of a business function or...		
4	Developing		Handles moderately complex assignments and works...		
5	Senior		Provides specialist or technical recommendations to...		
6	Expert		Requires ability to make tactical judgments that are...		
7	People Manager	(Sr.)Manager	Functional Manager	(Sr.)Consulting Manager	Operational team leader or professional/technical advisor...
8		Director		Consulting Director	Sets goals and targets for a department or management team...
9		Sr. Director		Principal	Sets annual plans in accordance with the global or regional strategy...
10		VP (or SVP)		Fellow	Accountable for developing and establishing long-term plans in line with the Advantest Group strategy...

Meanwhile, the new human resources framework offers labor management flexibility in setting up working hours, telecommuting arrangements and other job specifics, so that managers can more aptly address such matters directly in accordance with the laws and regulations of their respective nations and in line with local employment practices.

Starting from fiscal 2014, we have established a global personnel database, which is effectively utilized for project team composition and smooth personnel changes on a global scale. Beginning in fiscal 2015, we began using a new global personnel evaluation system to replace the existing personnel evaluations. In the future, we will be setting up human resource development schemes with a worldwide reach, promoting employee diversity through active efforts to hire and promote employees with differing backgrounds, and taking decisive steps toward forging an employee recruitment strategy that accords with the business strategies of our operations in diverse countries.

In the spirit of establishing ourselves as a truly global company going forward, Advantest will continue to work hard to create a professional business environment where every member of a diverse Advantest Group workforce can make the most of his or her individual capabilities.

**Pension system**

Domestically, Advantest employs a point system to determine retirement benefits. We have also introduced a prefunded company pension system with defined benefits. Management of pension assets is entrusted to the Advantest Corporate Pension Fund. Retirement benefits are divided into lump-sum payments, which are paid by the Company, and the pension fund portion, which is paid out according to years of service. In both cases, Advantest shoulders 100% of the cost.

## Occupational Health and Safety

Sustainability Report 2017

### Approach to Materiality in Occupational Health and Safety

Advantest sees the assurance of safety and the preservation of health of our employees a major prerequisite in executing our business activities, and it recognizes the need to continually raise awareness.

<b>Supervising division</b>	General Affairs Department
<b>KPI</b>	Occurrence rate of occupational accidents (frequency)
<b>FY2018 target</b>	0.0
<b>FY2016 result</b>	0.0
<b>Boundary (scope)</b>	Advantest Corporation (non-consolidated) in Japan
<b>Relevant policies</b>	Advantest Group Occupational Health and Safety Policy
<b>Relevant commitments</b>	Continuation of "Aiming for Zero Serious Accidents Activity," which is an independent target
<b>Responsible department/division</b>	Activities are executed at each business location and Health and Safety Committee aims to promote those activities.
<b>Relevant complaint processing policy</b>	Operation of the Health and Safety Committee and establishment of the Health Management Office
<b>Assessment</b>	✓

### Advantest Group Occupational Health and Safety Policy

Advantest Group recognizes that Health and Safety (H&S) is an important aspect of our business operations. This policy is set forth to ensure the Health and Safety of every Advantest employee.

#### 1. Health and Safety First

We will make H&S the first priority for employees in all Advantest operations, including product development, design, manufacturing, customer service, and others.

#### 2. Compliance with Laws and Regulations

We aim to achieve compliance with legal requirements through good occupational health and safety performance.

#### 3. Regular Review of Health and Safety Compliance

To support this policy, we will provide employees with an annual activity plan which will address every business location's H&S regulations through management support.

#### 4. Education and Training

We will ensure that employees receive appropriate training, and are competent to carry out their designated responsibilities.

#### 5. Disclosure of Occupational Health and Safety

We will communicate this basic policy and other H&S-related information to all employees in the Advantest Group, and work to raise awareness. We will also disclose information outside the company as necessary.

### Promotional System

At Advantest, every year we convene the "Health and Safety Committee Meeting" which decides the health and safety direction and policy for the whole group. The approach to health and safety is based on the main activity themes decided on at this meeting, upon which the health and safety committees at each location set their annual targets and plans. We also regularly hold horizontal health and safety committee secretariat meetings, and strengthen each location's health and safety activities through this sharing of information about relevant activities.

Members of the company-wide Health and Safety Committee is made up of the chair for the Health and Safety Committees at each business location while the members of the Health and Safety Committees at each business location is composed mostly of representatives of both the company and union employed at the business location.

#### Organization of Health and Safety Management (Japan)

**Implementation of Occupational Health and Safety Activities**

In fiscal 2016, we were able to reduce occupational accidents as a result of efforts that include reforms to the routines that confirm the state of measures implemented to prevent the recurrence of accidents as well as preventative safety activities in manufacturing divisions. We were also able to engage in measure to build a risk management system for chemical substances from an early stage to start operations together with amendments to laws and regulations.

In fiscal 2017, we are continuing to implement the “Aiming for Zero Serious Accidents Activity” and promote safety enhancement activities focused on preventive safety and avoiding the recurrence of accidents. We will chronologically investigate accidents that occur from fiscal 2017 and incorporate techniques to analyze the casual factors of accidents. We will also strive in preventative safety to reduce risk factors in the workplace as we have in fiscal 2016 through risk assessment activities in manufacturing divisions. Furthermore, as a way to strengthen traffic safety, we will aim to reduce accidents by raising awareness of drivers.

**Mental Health**

At Advantest we believe that vigorous employees make for a vigorous workplace. Accordingly, our Health Promotion Office supports efforts to ensure both the mental and physical health of our employees, so that we can provide a safe and comfortable workplace environment for them.

We introduced testing of stress levels around preventative safety in fiscal 2012 before they became required by law. By quantifying stress (thus making it visible), we promote stress awareness among all employees, which is useful for self-care. The fiscal 2016 stress diagnosis test, which was accessible through the corporate intranet, drew an 88.4% response rate. The 5% of employees with the highest diagnosed stress levels were invited to attend health consultation (and 15% did). With the introduction of an e-learning program, we reinforced self-care (95% participation).

The mental health training focused on managers at workplaces with high health risk; by helping managers to learn methods for tackling potential mental health issues in the workplace, we aimed to create workplaces where people are less likely to develop mental health problems.

Also, in light of the many types of stress that exist, we are establishing rules governing the provision of support for return to work, so that even if employees suffer mental health issues they can be sure that they can take the appropriate leave and eventually return to work.

## **Health Consultations**

At Advantest's Health Management Office, a comprehensive range of health professionals (including occupational health physicians, clinical psychologists, public health nurses, nurses, industrial counselors, etc.) provide counseling services for physical and mental problems of all kinds. Applications for counseling can be submitted easily by telephone or e-mail, or via the company's intranet. In fiscal 2016, counseling services were provided on 949 occasions

## **Labor-Management Dialog**

Labor unions currently representing our employees include company union JEIU, in which 73.4% of our employees and just over 99.6% of our labor union members are enrolled, and industrial union JMITU. Advantest negotiates in good faith with each of these labor unions.

Additionally, the labor agreement with JEIU includes health and safety and claims management, and we work cooperatively together to respond to issues regarding operation of the health and safety committees, Code of Conduct and HR claims management.

## Respecting and Protecting Human Rights

Sustainability Report 2017

### System to Promote the Respecting and Protecting Human Rights

Focused around the Corporate Ethics Office and the Code of Conduct Committee, Advantest strives to promote and set policies on human rights issues and deal with complaints about discriminatory treatment.

We share the Advantest Supply Chain CSR Promotion Guidebook with our suppliers, and endeavor to ensure that they are fully aware of the need to respect human rights (including the prohibition on forced labor, child labor, and discrimination, etc.).

### Creating a Workplace that Respects Human Rights

The ADVANTEST Way and the Code of Conduct incorporate a pledge that we will respect human rights without discriminating on the basis of age, gender, nationality, religion or other factors. We have established manual for human right and discrimination, prevention guidelines for sexual harassment and workplace bullying, and promoted to respect and protect human right.

To enhance employees' understanding of these issues, every year starting from April 2006 the training provided for new employees and for new managers has incorporated training in sexual harassment and workplace bullying prevention as well as human rights education.

In fiscal 2013, we launched an e-learning program on The ADVANTEST Way and the Code of Conduct for all Group employees. In fiscal 2016, this training was expanded to include all employees in the Advantest Group, both in Japan and overseas.

### Harassment Prevention

To prevent sexual harassment and workplace bullying, in July 1999 we created a manual and placed it on the intranet for easy reference.

The key points are as follows.

1. Definition of sexual harassment and workplace bullying
2. Sexual harassment and workplace bullying in the workplace
3. Impact of sexual harassment and workplace bullying
4. Sexual harassment and workplace bullying prevention measures

We are working to devise methods for self-checking that can be conducted in response to the issues above.

### Reporting and Consultation Framework for Human Rights Issues

We have set up a Corporate Ethics Helpline to address human rights issues and concerns that are not readily resolvable in the workplace, designed so that those facing such issues can draw on the support of our Corporate Ethics Office. Reports and consultations are handled mainly by the Corporate Ethics Office, and every precaution is taken to prevent those employees seeking help from suffering any disadvantage or retribution, for example, by protecting their anonymity. This helpline can also be used from overseas.

Moreover, in Japan, we have established a human rights protection committee together with the labor union to handle consultations about domestic human rights issues.

Through this activity, Advantest aims to foster a stress-free environment where employees respect one another's human rights.

## Membership of Civil Society

Sustainability Report 2017

### Prevention of Bribery and Compliance with the Anti-Monopoly Act

#### Basic Stance

The basic philosophy of the Advantest Group, which is embodied in the ADVANTEST Way and Code of Conduct, attaches great importance to being aware of one's responsibilities to society, and to the maintenance of integrity in one's conduct. Advantest implements a variety of measures to prevent the occurrence of bribery or other corrupt practices, and to prevent anti-competitive behavior.

#### Prevention of Bribery and Other Corrupt Practices

As a supplement to the Code of Conduct, Advantest has also formulated an Anti-corruption and Anti-bribery Policy, which clarifies, in detail, Advantest's rules in relation to prevention of bribery and other forms of corruption throughout the world.

To ensure that all Advantest employees fully understand the Policy, and to ensure that they do not engage in behavior that violates law or regulations in any country, all employees throughout the Advantest Group are required to undergo Anti-corruption and Anti-bribery Training on an annual basis.

In fiscal 2016, Advantest was not the subject of any legal action relating to bribery or other corrupt practices.

#### Compliance with the Anti-Monopoly Act

Advantest educates its employees about all aspects of anti-competitive behavior prevention as part of its Code of Conduct training, with particular emphasis being placed on the need to comply with the Act against Delay in Payment of Subcontract Proceeds, Etc. to Subcontractors; education regarding the Act is provided to new personnel in all relevant departments, including purchasing departments. In the future, Advantest intends to continue providing education and training aimed at ensuring the realization of fair and equitable transactions. In addition, Advantest's Internal Auditing Department undertakes sampling of purchasing transaction content, to verify that there are no violations of any kind.

In fiscal 2016, Advantest was not the subject of any legal action relating to bribery or other corrupt practices.

### Social Contribution Activities

#### Stance towards social contribution activities

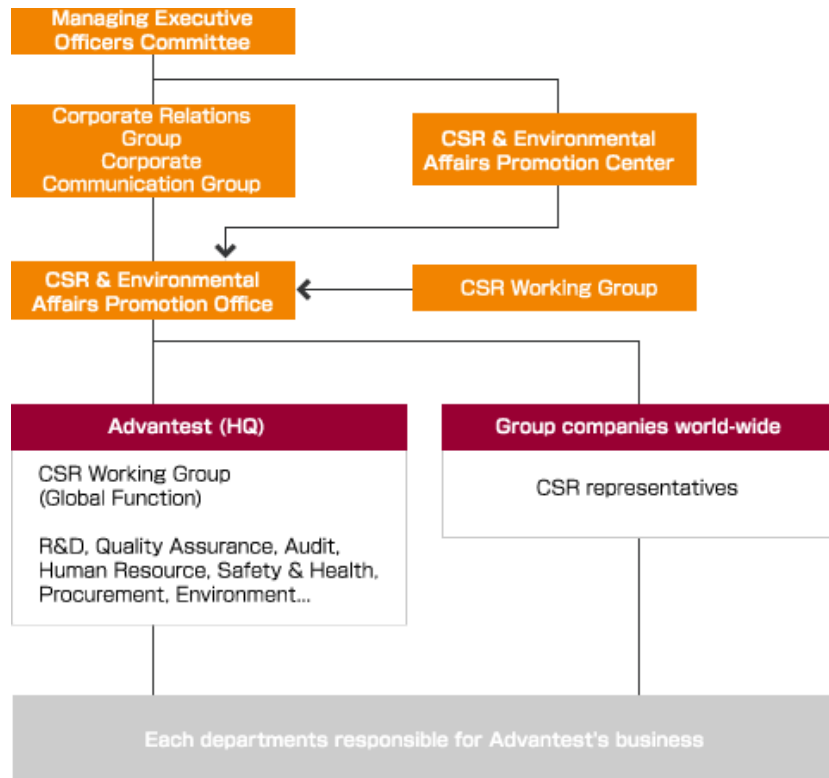

Advantest's Corporate Social Responsibility (CSR) Policy was stipulated as follows in April 2008: "Advantest respects each of its stakeholders and strives to maintain harmony with society in all its operations while contributing to the goal of a sustainable society." Based on this stance, Advantest conducts social contribution activities focused on the areas of preserving the global environment, developing the next generation, and contributing to local communities.

Advantest seeks to respond to the needs of its stakeholders and the community in order to contribute to the development of an affluent society through its social contribution activities, thereby fulfilling its corporate social responsibility as a global company.

#### Advantest's Organization for Promoting CSR

Advantest has a track record of promoting CSR and environmental initiatives in every country and region it operates in, especially Japan. However, it has been increasingly important for Advantest to conduct more global CSR and environmental initiatives through its supply chain as a company that contributes to a broader range of societies. We intend to continue contributing to regional societies through our CSR and environmental initiatives.

**Advantest's Organization for Promoting CSR**

- #1 : CSR Management Activities Related to Each Region to be Promoted by Subsidiaries in Each Region
- #2 : Global CSR Initiatives and CSR Activities Related to Business Operations (e.g Customer Relations, Quality Assurance, Governance and Compliance to be Promoted by the CSR Working Group)

**Framework to Promote Employee Participation**

At Advantest we are actively promoting employee participation in volunteer activities. Volunteer activities provide a way to contribute to society, and we recruit participants through our intranet. We also include reports on activities in each region and participants' views in our internal newsletter which contributes to attracting new participants. Employees can save up their unused holidays that would otherwise not be transferred to the next year and use them for volunteer activities.

**Examples of Social Contribution Activities in fiscal 2016**

**Volunteers for Residential Renovations**

Advantest America, Inc. (AAI) has supported Rebuilding Together Silicon Valley citizens' group activities for more than ten years. All employees and their families volunteer one day twice a year to repair and conduct maintenance on residences owned by low income families, persons with disabilities, and the elderly. The budget for the necessary materials for the renovations is also provided by AAI.

In 2016, volunteers conducted repairs and maintenance at the "Life Services Alternatives (LSA)" facility, which supports people with developmental disabilities, on April 23, and then also did work on October 22 for a resident living alone who would turn 100. Through this work, we have brought great joy to the facility and residents while volunteers had the opportunities to get to know their colleagues better.

### Onsite Science Lesson for Elementary Schools

Advantest conducts onsite science lessons for elementary school students for the purpose of communicating the fun of our main characteristic (the fun of manufacturing) to children.

On December 13, 2016, the lesson explained the principles and characteristics of optical communications to 11 six grade students from Sendai Nenosirosi Public Elementary School through an experiment with optical telephones through paper cups. On December 14, we created handmade speakers together with 47 fifth grade students from Kurihara Shiwahime Public Elementary School. The students eyes lit up about how the spectrum of light looked like a rainbow and laughed at the sudden dance when music came from the speakers. They also asked many searching questions directly to the adults.

These highly praised efforts also received letters of appreciation from Miyagi Prefecture as well as the Sendai City Board of Education.

### Cleaning Volunteers

The Advantest Group supports the participation of employees in environmental conservation activities worldwide.

On September 17, 2016, roughly 60 employee volunteers from Advantest (Singapore) Pte. Ltd. and their families cleaned the coastline. These volunteers cleaned approximately a 100 m section of the coastline, collecting 743 pieces of debris with a weight of 103 kg.

On October 21, 2016, 22 employee volunteers participated in thinning wood and dealing with dead trees in a forest in Kusatsu, Gunma. Volunteers moved cautiously in the direction wood was cut to avoid accidents as they chopped fallen trees into smaller pieces for collection. The work was hard yet satisfying.

**Product Liability**

Sustainability Report 2017

**Materiality to Respond to Product Liability**

- ▶ [Approach to Materiality in Customer Health and Safety](#)
- ▶ [Approach to Materiality in Product Service Compliance](#)

**Approach to Materiality in Customer Health and Safety**

Modern society views product safety with even greater importance. We recognize ongoing work to more readily respond to this societal expectation as vital.

<b>Supervising division</b>	QA, Field Service
<b>KPI</b>	Number of voluntary safety standards violations

**Advantest Group Quality Policy**

“Customer Satisfaction” is the fundamental basis of all our activity.

**We are committed to providing customer-satisfying products in a timely manner, by activating quality implementation from early in the design stage, and increasing the total efficiency of our overall sales and manufacturing process.**

**Quality Management System**

In keeping with our product quality plan, which calls for improvement in customer satisfaction, we have designed our quality management system to comply with the international quality assurance standard ISO9001 throughout the Company.

We have established an organization to promote the system within the company-wide framework, led by the Quality Assurance Manager under the supervision of executive management, which maintains and improves quality systems, with the goal of raising customer satisfaction. We have also constructed our own internal audit framework, and we maintain and improve our systems through regular internal audits.

## SQE Activities

We are committed to the notion that individual components underpin overall product quality, and therefore the quality of each and every component has to be exceptional. Premised on that assertion, the Advantest Group engages in SQE (Supplier Quality Engineering) initiatives beginning at the component adoption phase, drawing on the support of our supplier network. SQE initiatives are undertaken with the aim of enlisting a team of experts to bring about improvements to component quality. Accordingly, it is critical that we engage in practices to ensure component quality, particularly given that the number of parts used in our products is roughly equivalent to the 200,000 to 3,000,000 parts that make up an aircraft.

Our SQE initiatives involve the following three practices.

- Careful selection of components: When given the choice of multiple components with similar performance specifications, we select the best item through a process involving in-house quality analysis and evaluation.
- Quality improvement through PDCA: We apply PDCA-cycle practices from the component design phase to manufacturing to achieve improvements prior to high-volume production and thereafter.
- Ensuring that tolerances are maintained in component design: We aim for component design benchmarks determined on the basis of tolerances rather than standard specifications.

In this way, by running SQE activities from the product development stage, we can reduce problems with components in the manufacturing process and the risk of component problems reaching the marketplace, which contributes to greatly reducing the risk of losses. The results of this approach can be seen in the smooth running of our end users' processes and in the increased security that our clients enjoy in using our products.

Also, by decreasing the incidence of rejected parts we decrease the need for their exchange and disposal, and so contribute to reducing the environmental impact.

## Securing Product Safety and Quality

Aiming to meet the high product safety standards increasingly seen as important by modern society, we adopted the Advantest Product Safety Charter in May 1995.

To achieve the above, we formulated our Product Safety Promotion Regulations and established a companywide committee as an organization to promote advances in product safety. From May 1995 to the present, this committee has been continually active in product safety improvements.

In fiscal 2016, we commissioned specialist outside bodies to undertake inspections of the safety and durability of 10 Advantest's major products. The results indicated that there was no need for further revision of improvement of Advantest's safety specifications.

It should be noted that, in fiscal 2016 there were no violations of the standards specified in Advantest's Product Safety Promotion Regulations.

## Initiatives Aimed at Improving Software Quality

Advantest continues to implement initiatives aimed at improving software quality. Software for test systems, handlers and other such systems shipped by Advantest first goes through a process that involves quality verification by the Quality Assurance Division. The specification sheet, a parallel product of development, is examined by the Quality Assurance Division in real time and feedback is given, which helps to ensure quality at upstream stages of development. The examination is implemented by the time development is complete, and after fulfillment of quality standards is confirmed, products are shipped.

Beginning in 2012, process improvement activity using the "Toyota development process"\*1 has been implemented with the cooperation of the R&D Division. This activity improves the level of the design review process, and high-quality design enables high-quality and high-throughput product development. These initiatives help to bring about the timely delivery of even better products.

\*1 Source: The Toyota Product Development System, James M. Morgan, Jeffrey K. Liker, 2006.

## Availability

Advantest is committed to helping its customers achieve higher levels of productivity by offering them products that guarantee high availability — meaning that they are unlikely to malfunction, and will recover immediately should failure occur. More specifically, availability refers to the ratio of time that a system is operational over a given time, and as such constitutes one of the benchmarks of product integrity. The Advantest Group delivers high availability by working hard to improve MTBF\*1 so that systems will operate without malfunction over longer duration of use, while also reducing MTTR\*2 so that systems will be more readily serviceable when malfunction does occur.

\*1 MTBF: mean time between failure

\*2 MTTR: mean time to repair

## Design Review System Aimed at Improving Quality

Persistently stringent customer demands for functionality, performance and quality create demand for Advantest products equipped with increasingly large-scale and progressively more complex circuitry. Meanwhile, we are also responding to demands for shorter development lead times, a challenge we feel is best addressed by instilling quality at the upstream design phase so that we can detect potential issues early on. Accordingly, we introduced a new design review system in 2008 as a framework for achieving these goals.

- Our design review system was amended to ensure that the project leader establishes a design review plan when product development begins, and so that reviews are conducted regularly.
- We changed the system so that the relevant staff and the project leader, as well as the quality assurance division, carry out monitoring to prevent follow-up omissions, by enabling visual identification of issues raised.
- We also adopted the Design Review Meister System, which involves forming groups of in-house experts for each technical area to participate in the related design reviews. This system increases the rate of problem detection in design reviews, encourages the succession of technologies, and facilitates in-house education.

Many positive results have been achieved through these activities. For instance, the rate of defect detection during the design phase has recently improved, leading to a decrease in setbacks and fewer defects finding their way into the post process, thereby minimizing development delays. The new design review system has resulted in improvements in design quality and a reduction in development lead times. However, it has also revealed some cases in which problems that should have been detected by the designer ultimately found their way into the design review or the post process.

Advantest regularly collects analysis and feedback on issues that have gone undetected and makes improvements to the review framework as necessary. Moreover, going forward we will implement further improvements to the design process involving thorough checking prior to design reviews to achieve better design quality.

## Basic Policy for Improving Customer Satisfaction

Customer satisfaction is the most fundamental of principles underpinning Advantest's business. Our product quality policy, which is shared throughout the Group — "Elaborate for quality from the design stage, promote to optimize the whole process of manufacturing, and offer the timely and high-quality products our customers expect" — characterizes our portfolio of products that offer not only superior performance, but also superior environmental friendliness and safety. We are committed to keeping our customers satisfied at every stage, from design and manufacturing to sales and service, via guaranteed quality, top-notch service, and support on a global scale.

## Sales and Marketing Practices that Support Customer Satisfaction Gains

Markets related to semiconductors in recent years have more dramatic market fluctuations than ever before such as rapid investment into equipment in a backdrop of circumstances that include a higher functionality of smartphones and a growth in the number of units sold, evolution of electric vehicles, and an increase in investments related to data centers. We clearly understand the market situation with a response to the dramatic fluctuations in demand. In line with this, we integrated marketing of our business divisions into the sales headquarters in December 2016.

This integration of marketing fully grasps the market and requirements of customers in a timely manner and feeds these requirements back to the business division to allow for more efficient product development and provision to our customers. We are aiming to further improve customer satisfaction through this measure.

## Sales and Marketing Activities to Improve Customer Satisfaction

The semiconductor industry, which Advantest supports through its products, is an industry characterized by intense competition to develop next-generation technologies. Besides providing our customers with test solutions, Advantest also holds the annual VOICE Advantest Developer Conference, at which we share the latest technology and product information with our partner companies. The 10th VOICE Developer Conference held as a turning point in fiscal 2016 spanned the pacific ocean in May at a venue in San Diego, California and another in Hsinchu, Taiwan for the first time. This year was the largest VOICE ever held with 7 new sponsors and 44 newly participating companies with growth to more than 50% of the number of participants from the previous year. The renewed mobile app was also introduced at both venues with more than 74,000 people accessing the app. The event is scheduled to be held in America and China in fiscal 2017, and we will work so that the event can provide even more complete content.

Advantest has also continued to hold technical seminars at locations throughout the world, with the aim of presenting the latest information about our products and enhancing communication with customers. In 2016, technical seminars were held in Tel Aviv, Israel in June, Hsinchu, Taiwan in October, Manila, Manila, Philippines in November, and Tokyo as well as China (Shanghai, Beijing, Xi'an, and Shenzhen) in November and December. We were delighted to see so many Advantest customers attending these events.

Scene of presentation

In the future, Advantest will continue to hold events worldwide aimed at helping us to better understand customer needs and strengthen communication with customers, which in turn can help us to enhance our customer service provision.

## Promoting Customer Support

The Advantest Group has established its basic policy for customer support with the aim of realizing the globally-oriented restructuring of the Group's service businesses.

Our basic policy is outlined as follows.

### < Basic policy for customer support >

- We will propose total solutions in the form of support packages designed to deliver maximum efficiency to our customers in their device measurement operations.
- We will propose unified service support matching the customer's business model from development to the mass production environment.
- We will respond to customer demands by proposing service support packages that encompass total solutions.
- We will always take the customer's point of view and draw on our global organization in offering solutions.
- Our premium services and customer support will not only be efficient, but will also take the environment and safety into consideration.
- We will offer high-value-added professional services.
- We will strive to maintain our zero-accident record by thoroughly observing safety standards in field service provision and elsewhere.

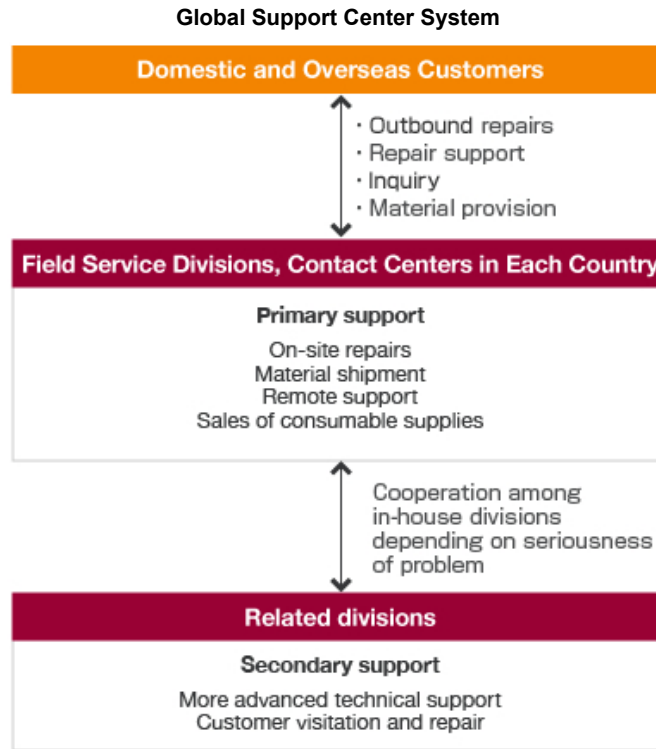

## Better Customer Support with a Global Focus

Advantest is building a global support framework capable of responding effectively to service support requests and other inquiries from customers. While responding to everyday service support requests through contact centers in each country, as well as by telephone and e-mail, we are also implementing primary support consisting of technical service and onsite repairs by field engineers.

We station expert support teams in product development bases to carry out secondary support, allowing us to respond appropriately to the content and difficulty of service requests.

We have developed a global supply-chain network covering customer operations ranging from their development bases to mass production facilities. Moreover, we also operate a supply-chain control mechanism through which replacement equipment and parts at service centers in each country are monitored to determine inventory needs at respective locations worldwide.

We continue to run an engineer exchange program between overseas subsidiaries and our secondary support division, which helps engineers to improve their professional skills and raises the quality of our support. This two- to three-year program aims to sharpen engineers' technical skills, develop cross-cultural competencies, and raise foreign language and communication proficiencies. In the mass production facilities of customers, we offer on-request expert consulting and solutions regarding productivity issues. Also, we offer device measurement training to our customers, and provide professional advice in that regard.

**Recipient of the “10 BEST” Customer Satisfaction Award for the 29th Consecutive Year, on the Basis of the VLSI Research Survey**

Advantest aims for a clear grasp of customer needs and strives to provide customers with high-performance, premium-quality total test solutions in a timely manner.

At Advantest, we gain a better understanding of our customers’ needs through information that we acquire from our daily business activities, and also through yearly participation in the customer satisfaction survey conducted by VLSI Research, a company renowned for its semiconductor market research. Based on this year’s survey, we received the “10 BEST” award granted to the top-ten ranking companies for the 29th year in a row.

VLSI Research: 10 BEST

**Corporate Governance**

Sustainability Report 2017

**Our Stance to Corporate Governance**

We will continuously improve ourselves so that we can offer technology, products and services that will satisfy our customers worldwide, and contribute to development of society through development of the most advanced technology based on our corporate mission: "Enabling the Leading-Edge Technology". Following this corporate mission, we have established The ADVANTEST Way & Code of Conduct as our action guidelines for executives and employees of the entire Group to understand and comply with the corporate mission. We will also answer the trust from our stakeholders and aim toward sustainable growth of the Group and mid- to long-term growth of corporate value. In realizing this, we set building a governance system that is fair, efficient, and highly transparent as the foundation of corporate governance. Our corporate governance framework and philosophy is formulated as a basic policy and made available on the website.

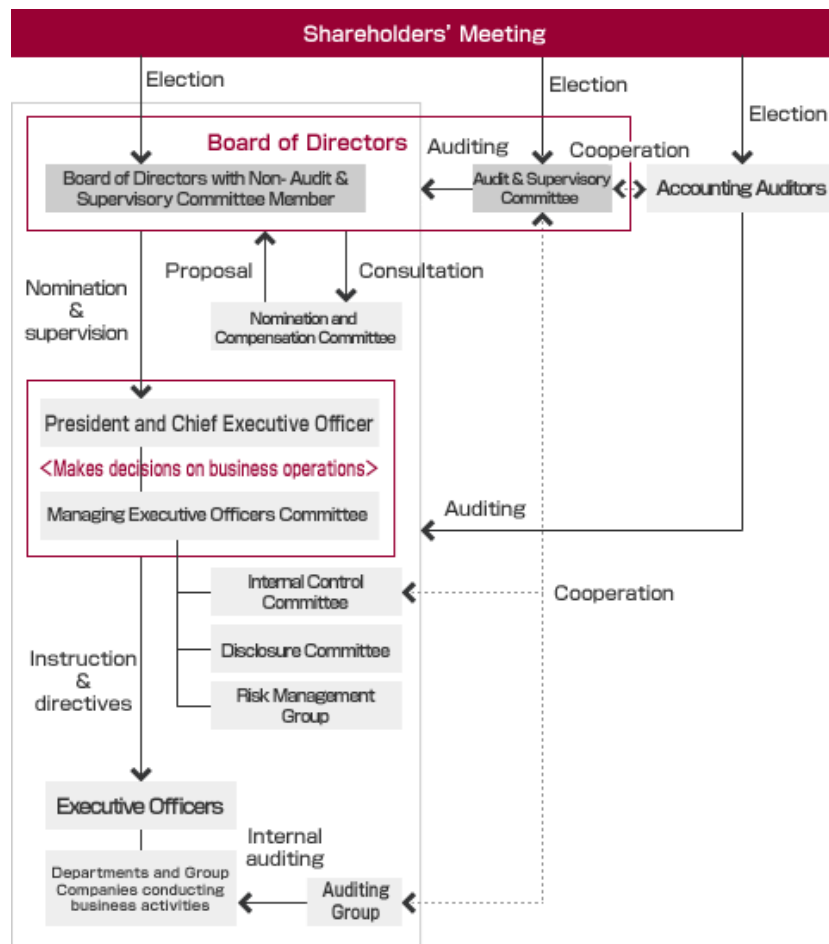

[Advantest Corporate Governance Policy](#)

**Management Structure**

The global business environment is changing more rapidly than ever before. To continuously increase our corporate value and competitiveness in today's world, we emphasize swift decision-making and execution. We also place an emphasis on sound, highly transparent business operations in compliance with relevant laws and regulations. In order to meet these challenges, we draw clear lines of authority within our organization and set responsibilities in accordance with each management function, assigning each role to the best person for the job.

We have been implementing Company with an Audit & Supervisory Committee system since June 2015. Advantest further strengthened its corporate governance and Board of Directors' audit function under the company with an audit & supervisory committee which the audit and supervisory committee member uses their voting rights in Board of Director Meetings, and with the aim of further increasing our corporate value. Furthermore we have established a structure that can quickly respond to the rapidly changing business environment, and in order to strengthen our corporate governance, starting from 2003 we introduced an executive officer system.

**Corporate governance structure**

## Board of Directors

The Board of Directors, as a management decision-making body, makes decisions on the basic policy for the management of the entire group, as well as decisions on important matters such as management strategy, and, in order to ensure quick and efficient business operations, monitors and supervises whether executive committees that have had authority delegated to them are operating appropriately. In a Company with an Audit & Supervisory Committee, the term of the Non- Audit & Supervisory Committee Member is one year, and the term of the Audit & Supervisory Committee Member is two years. The Board of Directors (including members of the Audit & Supervisory Committee ) is made up of five in-house Directors and four outside Directors, making nine people in total\*. Information regarding the background of directors, the reasons for their selection, etc., is given in the director appointment proposals section of the [Notification of Convening of Regular Meetings](#) of the Board of Directors and in the company's business report.

### ▶ [More information about the Shareholders' Meeting](#)

We have established a policy and procedure to assure objectivity and transparency of nomination and compensation of Directors and are made publicly available on the website.

### ▶ [Policy and procedures for nominating Directors](#)

In 2005, Advantest established a Nomination and Compensation Committee as a discretionary institution. Nomination and Compensation Committee members consist from three Directors including two outside Directors selected by the Board of Directors' resolution. The Nomination and Compensation Committee, in consultation with the Board of Directors, discusses matters relating to nomination and compensation of Directors, and makes proposals to the Board of Directors.

\* The number of people given is correct as of June 27, 2017

## Executive Officer System

Advantest has introduced an Executive Officer system that keeps decision-making functions separate from executive functions, in order to boost management efficiency.

Executive Officers are selected by the Board of Directors as senior management dedicated to the execution of operations. They have the responsibility for swiftly and efficiently implementing management policies and strategies determined by the Board of Directors. The term of each Executive Officer is limited to one year, so as to achieve more explicit accountability.

There are a total of 22 Executive Officers\*, ten of whom are not citizens of Japan (America: 2; Europe: 3; Asia: 5; Percent of non-Japanese: 43%), appointed to enhance integration of the company's global operations.

\* The number of people given is correct as of June 27, 2017

### ▶ [List of Directors](#)

## Executive Compensation

With regard to decisions relating to the compensation of members of the Board of Directors (excluding directors who are members of the Audit & Supervisory Committee) and executive officers, following consultation with the Board, the Nomination and Compensation Committee implements review, and then submits a proposal to the Board. The Board then reviews the proposal submitted by the Committee, and makes a final decision regarding compensation. The compensation of directors who are members of the Audit & Supervisory Committee is determined following consultation with those directors who are members of the Audit & Supervisory Committee.

Executive compensation for fiscal 2016 is as follows.

Classification	Number of persons receiving compensation	Compensation amount
Directors (excluding directors who are members of the Audit & Supervisory Committee)	6 persons	409 million yen
Directors who are members of the Audit & Supervisory Committee	3 persons	64 million yen
Total	9 persons	473 million yen

1. The amount of compensation includes the payment for stock options.
2. Of the above-mentioned compensation, for the two outside Directors (excluding Directors serving on the Audit and Supervisory Committee), two outside Directors (serving on the Audit and Supervisory Committee), and two outside Auditors, the amount of compensation was 36 million yen.

## Internal Controls

Advantest has set up and maintains internal control systems that correspond to the requirements of the Companies Act and the Financial Instruments and Exchange Act. In order to manage the group with an emphasis on performance evaluation based on the consolidated balance sheet, these systems are built as a unified system that includes both Advantest and its affiliates.

Also, Advantest has established an Internal Control Committee with related Directors as members, and we operate the internal control systems in a unified manner on the basis of the policies set by the Committee.

## Auditing System

### Audit & Supervisory Committee

In accordance with the auditing policy formulated by the Audit & Supervisory Committee, the Committee members attend meetings of the Board of Directors and other important meetings; undertake surveys of the state of business operations and of the company's assets, and audit the carrying out of their duties by directors, executive officers and other executive organs within the company. The Audit & Supervisory Committee has three members (including one standing member): one inside director, and two outside directors.\* Those directors who serve as members of the Committee are appointed by the Shareholders Meeting separately from other directors who are not members of the Committee.

To facilitate the implementation of appropriate, effective auditing, the Audit & Supervisory Committee may request information from the Auditing Group and from the external auditors, and there are opportunities for the exchange of views with the Auditing Group and the external auditors.

\* The number of persons is correct as of June 28, 2016

### Accounting Auditors

Accounting Auditors perform accounting audits of the consolidated financial statements, accounting documents etc., and produce an audit report. Advantest has appointed an auditing firm as independent auditor, and receives a set audit.

## Internal Auditing

Advantest has established an internal auditing team that comprises the Auditing Group and the Singapore auditing team. To verify whether the company's day-to-day operations are carried out appropriately and efficiently in accordance with the requirements of relevant domestic and overseas laws and ordinances, and whether operations are performed efficiently, the internal auditing team implements operational auditing, compliance auditing and internal controls auditing. Besides evaluating the efficacy of the internal controls system, when necessary the internal auditing team also provides support to assist in the making of improvements at individual business locations. The internal auditing team hold appropriate qualifications (such as Certified Public Accountant, Certified Internal Auditor, or Qualified Internal Auditor), and all team members are committed to enhancing auditing quality.

**Risk Management**

Sustainability Report 2017

**Approach to Materiality in Customer Privacy**

Information that we receive from our customers and business partners is information that should be socially protected and it is also an informational asset for the company. We recognize the proper protection and management of this information as vital.

<b>Assessment</b>	✓

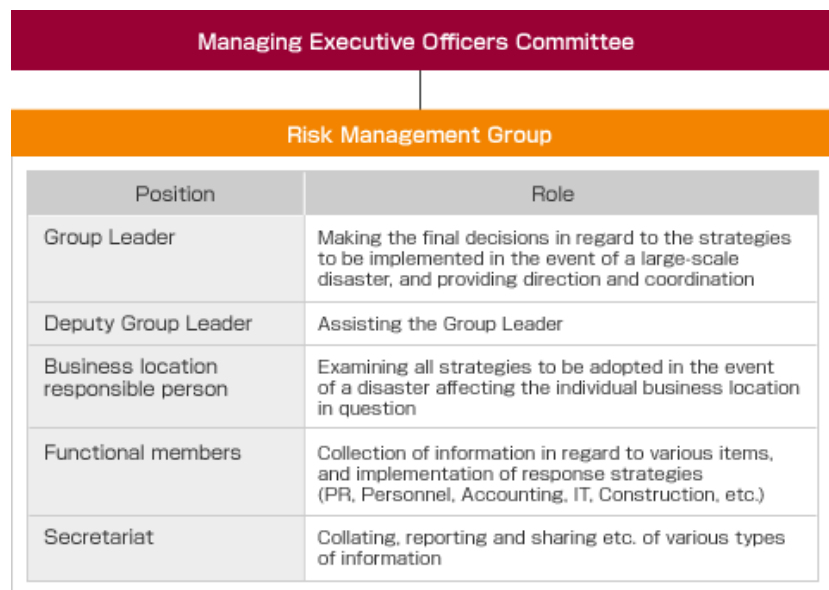

**Risk Management Basic Policy**

The Advantest Group will conduct measures to minimize damage should any of the following events occur:

1. If damage is caused to buildings or facilities, or if networks and systems stop functioning, thereby making it difficult to continue our business operations, or if there is the possibility of this type of situation occurring due to a disaster or accident;
2. If there is the danger of one of our executives or employees being killed or injured or their life or physical health is put at risk due to a disaster or accident;
3. If there is an occurrence of scandal or incident that has the potential to become a matter of social concern; or,
4. If any event other than those described above were to occur that could cause a significant impact on the business of the Group or its affiliates due to a disaster or accident.

**Risk Management System**

In December 2001, Advantest established a Risk Management Group with the Company's president as its head. The Risk Management Group will convene when any of the above events occur, and will consolidate information flows, evaluate the problem, direct the initial response, and formulate recovery plans. The Group will remain in operation until recovery is complete.

**Major Risk**

Risks associated with Advantest's business are shown below.

▶ [Business Risks](#)

**Business Continuity Plan**

Advantest Corporation established the following basic policy during fiscal 2007 in preparation for large-scale natural disasters. We have devised our business continuity plan based on this policy.

**Business Continuity Plan (BCP) — basic policies**

- **We will place top priority on ensuring human safety should a major disaster strike.**
- **We will fulfill our responsibility to our stakeholders by ensuring that any impairment to our operations has a minimal adverse impact on our suppliers and other stakeholders.**
- **We will cooperate with local bodies in regular disaster prevention measures, and if a disaster should strike near any of our locations, we will contribute to local recovery.**

After the Great East Japan Earthquake in March 2011, we began reviewing our disaster prevention arrangements. In fiscal 2012, we revised our Business Continuity Plan (BCP) to take into account the possibility of an earthquake directly under Tokyo and flooding along the Tone River, and to ensure the integrity of our supply system even in the event of such disasters. Within the BCP, the following measures are stipulated in line with the basic policy.

Basic Policy	Specific Measures
<b>1.Ensuring human safety</b>	In addition to continuing with regular disaster prevention drills and safety confirmation drills, we will strengthen crisis management and business continuity systems, making human safety the top priority.
<b>2.Fulfillment of supply responsibilities</b>	When an earthquake occurs, supply systems at our main manufacturing plant (i.e. the Gunma Factory) will continue. In the case of a flood, it is assumed that supply systems will be maintained at alternative manufacturing sites.  In preparation for cases where workplace attendance is temporarily impractical because of damage to offices or infrastructure, we will establish an environment allowing high-priority work to be done from home.
<b>3.Regional &amp; social contributions</b>	Our Gunma R&D Center has been designated by the town of Meiwa as an evacuation shelter in case of flooding, and we contribute to the area by keeping the site ready for flood evacuees.

**Measures Implemented in fiscal 2016**

In 2016, management reviews were conducted twice, about the role, policies, and state of activities in August due to restructuring of the Risk Management Group and about the initial response to maintain the head office functions in March. In these activities each quarter, we examined BCP training such as safety that includes the building and equipment related to disaster prevention training in addition to secondary disaster prevention inspections as well as organized and shared information for the initial response of supervisors and each person in charge of business locations. We also conducted training to confirm the safety of our employees in Japan three times in addition to actually confirming the safety of employees in the event of an earthquake to quickly register the safety of each and every employee.

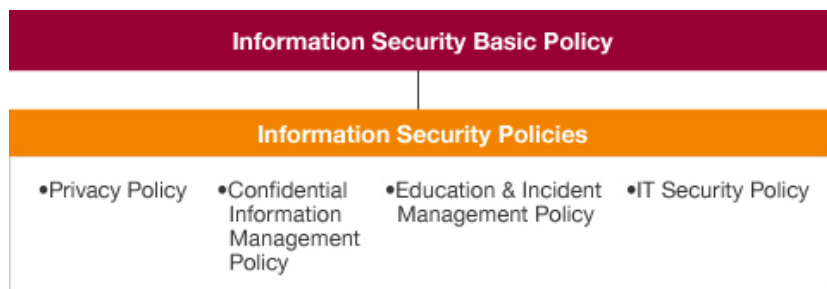

This year, Advantest has also been working to put in place a Business Continuity Management System (BCMS) for the ongoing adjustment of quarterly training and of adjustments to BCM plans etc. based on the results of such training.

**Information Security Management Policy**

Advantest is fully aware that information we receive from suppliers and information pertaining to our technical and sales operations are important assets; to effectively manage this information we pursue information security practices that include developing regulations, constructing control systems and providing employee training.

**Policies and rules relating to information security**

Advantest has established an Information Security Basic Policy. Rules are specified in four policies: our Privacy Policy, Confidential Information Management Policy, Education & Incident Management Policy, and IT Security Policy.

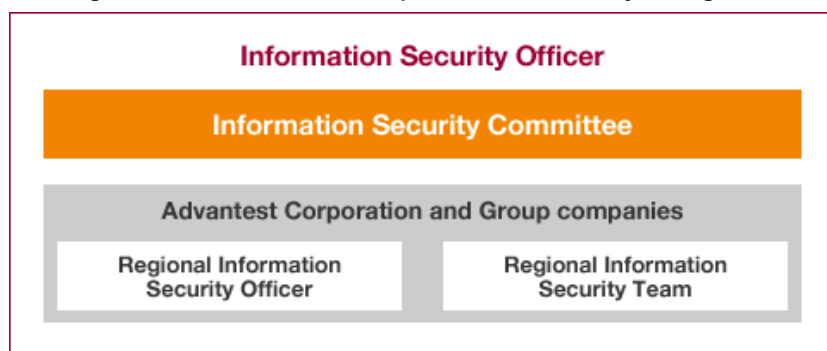

**Organization of Information Security Management System**

Advantest regards implementation of information security controls as a key management issue, and has accordingly assigned the Senior Executive Officer to act as Information Security Officer responsible for such systems on a global basis.

Moreover, we have set up a system that enables our offices in respective countries to autonomously address information security issues. Under this system, Regional Information Security Officers posted in respective countries bring a variety of viewpoints to the table in the course of deliberating on potential information security measures to be applied on a group-wide basis, and also when considering which policies and rules should be adopted, or otherwise revised or abolished.

Specifically, the head of each Group company’s administration division has been assigned to the position of Regional Information Security Officer, responsible for security management in their respective regions. Meanwhile, members from related divisions in respective countries have been tasked with implementing information security measures.

**Organization of Advantest Group Information Security management**

**Information Security Training**

Based on the view that the final barrier for information security is “people”, we aim to thoroughly publicize information security policies and related regulations. We administer information security training on each policy — Privacy Policy, Confidential Information Management Policy, Education & Incident Management Policy, and IT Security Policy — to all employees in Japan and overseas.

Going forward, we intend to continue developing more practical content and offering more pragmatic training through learning activities that entail repeated exposure to information security rules and content covering key topics in that regard.

**Initiatives for Strengthening Information Security**

In fiscal 2011, we adopted a system whereby internal audit divisions perform information security audits, which enables us to conduct more objective rules-based checks and provide feedback to divisions that have been audited.

In updating our rules governing access to information equipment, we dropped requirements stipulating that employees must use encrypted PCs only, and now allow them to use thin client computer platforms through which they can perform work in secure environments without the prospect of leaving traces of data behind after use. Also, we made sure that our uniform Group-wide guidelines for business-related use of smartphones enable our employees to draw on such devices effectively in a business context, and in a manner that facilitates better customer service.

At some point we will gauge the effectiveness of our information security measures and will consider objective criteria based on which we can evaluate our information security system and pinpoint its strengths and weaknesses.

## ■ Confidential Information Protection

Our Information Security Basic Policy defines confidential information as that which has been disclosed by clients under contract along with that which is important to the company; moreover, the policy stipulates that such information be handled in accordance with relevant regulations.

Accordingly, we are committed to ensuring that confidential information is not divulged outside the company by ensuring that it is protected through use of adequate controls governing its storage, disclosure and handling. In fiscal 2016, there were no incidents involving the unauthorized disclosure of important confidential information, etc.

## ■ Personal Information Protection

We consider the confidentiality of all personal information entrusted to us to be very important, and accordingly we take steps to ensure that such information is properly protected and managed. In fiscal 2016, there were no incidents involving the unauthorized disclosure of important personal information, etc.

### ▶ [Privacy Policy](#)

Our commitment to safeguarding personal information entails posting personal information managers in divisions handling such duties, and furthermore ensuring that those managers properly carry out their duties in regard to overseeing such information.

Furthermore, we perform regular audits of personal information control and use practices in the respective divisions, and make improvements whenever deficiencies are discovered.

In Group companies outside of Japan, Regional Information Security Officers work to protect and manage personal information in accordance with the laws, regulations, and demands of each respective country or region.

## Advantest's CSR

Sustainability Report 2017

### Corporate Social Responsibility (CSR) Policy

Advantest Group aims for sustainable development and to enhance our corporate value under the corporate mission of "Enabling the Leading-Edge Technology" and our "Quest for the Essence" corporate mantra.

Also, we will respect stakeholders as described below to promote harmony with society and contribute towards the realization of a sustainable society.

- In harmony with society, we will work for environmental conservation and to reduce environmental impacts.
- We will respect customers, and provide high quality products and services that meet their needs.
- We will respect shareholders and investors, return corporate profits to them, and disclose information.
- We will respect our business partners and build cooperative relationships emphasizing mutual development.
- We will respect our employees, provide fair treatment, and strive to create employee-friendly workplaces that are conducive to effective working.

### CSR Policy Initiatives

Based on the Advantest Group's corporate mission of delivering "Enabling the Leading-Edge Technology," our purpose as a Group is to use our "measurement and testing technologies" to support the development of society and to help to ensure that people throughout the world can live safely and securely. We provide our customers in many countries around the world with a wide range of products and services, and we are contributing to society through our business activities in our core competence field of "measurement and testing technologies." In addition, we are using our business activities to meet the needs of our stakeholders and of society, and to fulfill our social responsibilities as a group with a presence throughout the world.

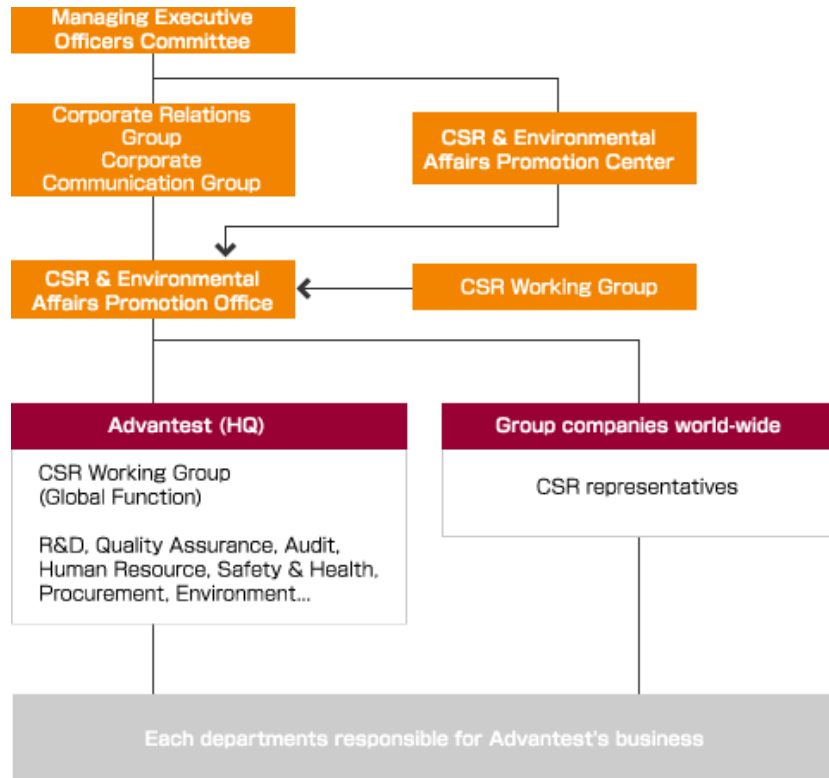

### Organization for Promoting CSR

We established the CSR & Environmental Affairs Promotion Center, which is headed by the President and CEO, in order to clarify the objectives and responsibilities of the executives within the Advantest Group. The Center is responsible for the overall promotion of our CSR initiatives and affairs. Beneath this organization we have positioned the CSR & Environmental Affairs Promotion Office, which is responsible for implementing our social and environmental contribution activities. In addition, the CSR & Environmental Affairs Promotion Office shares CSR-related information with divisions and departments throughout the Company exchange CSR-related information, and provides support for the CSR activities that are undertaken on a daily basis by individual divisions and departments, as well as reporting to the director responsible for supervising CSR operations, and requesting approval of key materiality aspects from the Managing Executive Officers Committee as necessary.

To facilitate the development of a company-wide CSR framework, a CSR Working Group has been established with members appointed from the company's units responsible for general affairs, human resources, PR, IR, sales, quality assurance, production, etc.; the CSR Working Group implements activities on a worldwide basis.

**Advantest's Organization for Promoting CSR**

- #1 : CSR Management Activities Related to Each Region to be Promoted by Subsidiaries in Each Region
- #2 : Global CSR Initiatives and CSR Activities Related to Business Operations (e.g Customer Relations, Quality Assurance, Governance and Compliance to be Promoted by the CSR Working Group)

**Main Activities in fiscal 2016**

We have established Key Performance Indicators (KPI) as well as fiscal 2018 targets for materiality designated by the Advantest Group.

**Business Fields and Main Products**

Advantest is a global leader in test and measurement. We provide real solutions to customers in a wide range of fields, from semiconductor manufacturing and R&D to electronics, medical devices, and pharmaceuticals.

**Semiconductor and Component Test System**

Semiconductor test systems, known as Automatic Test Equipment (ATE), are essential to quality assurance. Advantest is a pioneer in this field and a world leader in test technology. Our diverse, high-productivity solutions provide unmatched support for suppliers of various devices, ranging from logic ICs to the memory chips used in computers, servers, game consoles, smartphones and vehicles.

**Commitment to External Initiatives**

Advantest is supporting measures aimed at the realization of a sustainable society through its sponsorship for and participation in various domestic and international statements and guidelines.

**EICC Code of Conduct**

In its business operations, Advantest follows the stipulations of the Electronic Industry Code of Conduct drawn up by the Electronic Industry Citizenship Coalition (EICC®), a leading electronics industry supply chain CSR alliance.

**Response to the Conflict Minerals Issue**

Advantest participates in the Responsible Minerals Trade Working Group established by JEITA\*, and is implementing various measures, in collaboration with industry bodies, to help tackle the conflict minerals issue.

\* JEITA: Japan Electronics and Information Technology Industries Association

## Management Approach

Sustainability Report 2017

### Basic Stance

Through our business activities, we create various kinds of economic value, both directly and indirectly.

This value is distributed to a variety of shareholders, including shareholders, employees, etc., and has an extensive social impact. Reflecting this, key materiality aspects have been identified in the economic dimension, and Advantest is implementing measures based on these identified materiality aspects, including measures aimed at fostering effective protection of intellectual property rights, etc.

### Identified Materiality Aspects and KPIs, and Targets for FY2018

Materiality Aspect	KPI	Measures implemented
Economic Performance	Sales and operating income margin	<a href="#">Economic Impact</a>
Intellectual Property Protection	Percentage of employees who have undergone e-learning training relating to intellectual property protection	<a href="#">Intellectual Property Protection</a>

For more detailed information about measures relating to the protection of intellectual property, see "[Ethics and Integrity](#)".

**Economic Impact**

Sustainability Report 2017

**Approach to Materiality in Economic Performance**

Advantest considers economic performance such as net sales and operating income our foundation and the most important factor for the company to continue ongoing activities.

<b>Supervising division</b>	Management Planning Department
<b>KPI</b>	Net sales/operating profit margin
<b>FY2017 target</b>	Net sales: 172.0 billion yen; Operating profit margin: 10.5%
<b>FY2016 result</b>	Net sales: 155.9 billion yen; Operating profit margin: 8.9%

### Advantest Procurement Policy

The Advantest Group's CSR Policy pledges respect for our suppliers, places value on open communication with our suppliers, and emphasizes the maintenance of fair business relationships in accordance with relevant laws and regulations. We are also committed to sharing values and building collaborative relationships with our suppliers, toward our goal of achieving mutual growth.

▶ [Advantest Procurement Policy](#)

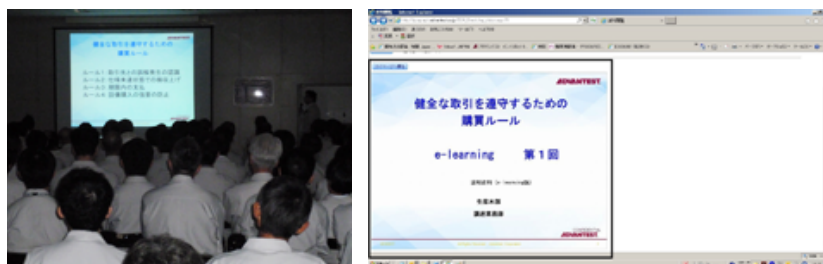

### Organization to Promote Fair Trade (CSR Procurement)

In order to promote and manage fair trade we have established a department whose role is to check the purchasing department and we implement a once-yearly audit by Audit and Supervisory Committee to ensure that there are no problems and that normal trade practices are being followed. Also, every year we implement an internal control audit using an external organization and we were able to confirm again in fiscal 2016 that there were no problems.

Moreover, for outstanding orders, in addition to checking the status at the end of each month to ensure that there are no acceptance inspection omissions, for orders where the acceptance inspection is taking a long time we report the reason for this and the expected completion date to the Audit and Supervisory Committee.

### Education for Practicing Fair Trade

Since fiscal 2010, we have held seminars on a subcontractors law, participation in which is not restricted to purchasing department staff. Moreover, we began employee e-learning about the Act against Delay in Payment of Subcontract Proceeds, Etc. to Subcontractors in fiscal 2016 to raise greater awareness about this law. Almost 100% of our employees took this e-learning in fiscal 2016. We also implemented follow-up training with internal instructors to our purchasing business departments. In the future, we will continue to educate our employees in order to realize the principles of fair trade.

A scene from the subcontractors law seminar

### Social Responsibility in the Supply Chain

#### Implementation of questionnaire survey

Advantest has published its Procurement Policy and the Advantest CSR Procurement Guidebook on its homepage as a way of fulfilling its social responsibility in a supply chain that includes all of its business partners, and it asks these business partners to adhere to relevant laws and ordinances as well as social norms.

We evaluate our business partners on QCD\* every quarter and carry out a CSR questionnaire annually for our business partners who largely impact procurement of Advantest. We feed the results back to the business partners to create a relationship where they can develop together with us.

For fiscal 2016 we carried out the questionnaire in March 2017 and obtained answers from each company regarding their approach to human rights, labor problems, health and safety, environmental conservation, fair trade, and intellectual property

protection. The return rate for completed questionnaires was 100%. We were able to confirm that each company had established an overall policy and Code of Conduct for societal responsibility. We also determined that none of our business partners had problems related to aspects such as compliance and labor management. We will conduct another questionnaire in fiscal 2017 and confirm our business partners' response to our purchasing policy.

\* QCD: abbreviation of Quality, Cost, Delivery

▶ [About Advantest Procurement Policy](#)

▶ [Advantest CSR Procurement Guidebook](#)  (PDF: 136KB)

## Set up of inquiry and reporting window

During trade with our business partners, in the event that one of our employees infringes, or is suspected to infringe, on our Code of Conduct, a trade contract or a relevant law, we request that this is reported to the [Contact Window](#) on our website. In fiscal 2016 we did not receive any complaints. The reporter and their company would not be penalized in any way for reporting. Following an investigation, in the case that a problem is recognized, the action in question would be stopped and measures would be taken to prevent reoccurrence.

## Response to Conflict Minerals

### Implement of survey

At Advantest, in order to respond to Section 1502 (conflict minerals provisions) of Title XV of the Dodd-Frank Wall Street Reform and Consumer Protection Act and related regulations in the U.S., we are playing an active role together with the industry organization to address the conflict minerals problem.

Since 2013 we have been implementing an annual survey of our business partners regarding use of conflict minerals through a CFSI\* report (conflict mineral reporting template (CMRT)) and releasing the results.

\* CFSI: [Conflict-Free Sourcing Initiative](#) 

### Cooperation with industry bodies

In December 2012 we participated in the JEITA\* "Responsible Mineral Procurement Review Committee" and we have been working together with industry organizations to promote conflict-free procurement and spread awareness.

\* JEITA: Japan Electronics and Information Technology Industries Association

**The Advantest Way & Code of Conduct**

Sustainability Report 2017

The ADVANTEST Way and the Code of Conduct provides a set of rules and standards of behavior that all executives and employees must observe when carrying out the Group's global corporate activities. At Advantest, we adopt a global perspective when implementing our company management and our social and environmental activities so that we can use our cutting-edge "measurement and testing technologies" to fulfill the expectations that our customers and all of our stakeholders throughout the world hold for us.

## Our Stance to Compliance

### Overview of Policy

Companies aiming for sustainable growth need employees who fulfill their social responsibilities and who possess a strong sense of ethics. They also need to earn the trust of stakeholders. Based on this belief, Advantest has established The ADVANTEST Way — the fundamental handbook which lays out our management direction and policy, and which comprises our Corporate Mission (“Enabling the Leading-Edge Technology”), Corporate Mantra (“Quest for the Essence”) and CSR Policy — as well as The Advantest Code of Conduct, which provides specific guidelines for employees to enhance their ethical awareness.

▶ [The ADVANTEST Way & Code of Conduct](#)

### Compliance Promotion System

Advantest gives guidance and advice to all Group employees to ensure that they fully understand and comply with the “The ADVANTEST Way & Code of Conduct”, and has established a global management structure.

When employees are carrying out day-to-day business operations, if they come across a problem that they feel is in violation with or contradiction of “The ADVANTEST Way & Code of Conduct”, they should first report to and consult with the department head, and if necessary, to other relevant departments. In 2006, we established a “Corporate Ethics Helpline”, which we operate globally, for cases where it is difficult for employees to consult with department heads or other relevant departments. Since setting up the helpline, we have received various communications from Group employees both in Japan and overseas; we then seek to resolve these issues while maintaining the privacy of the employees concerned. We had two issues reported in fiscal 2016 and response fell to the departments in charge. We will continue to sincerely respond to such communications so as to maintain Advantest’s integrity.

Also, as a member of the international community, we regularly conduct compliance audits through our global audit teams in order to ensure that we follow the different laws and regulations in each country and carry out our business activities appropriately.

## Compliance Education

At Advantest, we distribute a booklet called “The ADVANTEST Way & Code of Conduct” to all Group employees and implement efforts to ensure employee commitment. However, with the full integration of Verigy Inc. into Advantest in April 2012, the creation of new overseas production bases and the internationalization of both R&D and production bases, there is an increasing need to ensure thorough legal compliance worldwide and to pay attention to compliance across the Group while also ensuring a thorough understanding of the different laws and regulations in each country.

For this reason, through cooperation between Advantest’s audit teams and the legal affairs departments, we are working to strengthen training activities related to national laws and regulations. In addition, to ensure employee commitment in regard to compliance matters, we are implementing regular e-learning sessions for all Group employees on “The ADVANTEST Way & Code of Conduct” and on the subject of “anti-corruption and anti-bribery”.

In fiscal 2016, all of our Group employees took e-learning education and agreed to adhere to compliance.

## Intellectual Property Protection

Sustainability Report 2017

### Approach to Materiality in the Protection of Intellectual Property

The strength of Advantest is its state-of-the-art technological capabilities. Therefore, we believe protecting our intellectual property as the source of our competitiveness vital to persist as an enterprise.

<b>Supervising division</b>	Intellectual Property Management
<b>KPI</b>	Ratio of e-learning students in periodic education about intellectual property
<b>FY2018 target</b>	100%
<b>FY2016 result</b>	98.7%
<b>Boundary (scope)</b>	Advantest Group

<b>Relevant commitments</b>	-
<b>Responsible department/division</b>	Intellectual Property Management
<b>Relevant complaint processing policy</b>	-
<b>Assessment</b>	✓(Cleared over 98% of fiscal 2016 targets set as interim targets)

### Basic Philosophy

In relation to intellectual property, Advantest’s overarching policy is to observe all related laws and regulations and to respect the intellectual property rights of third parties.

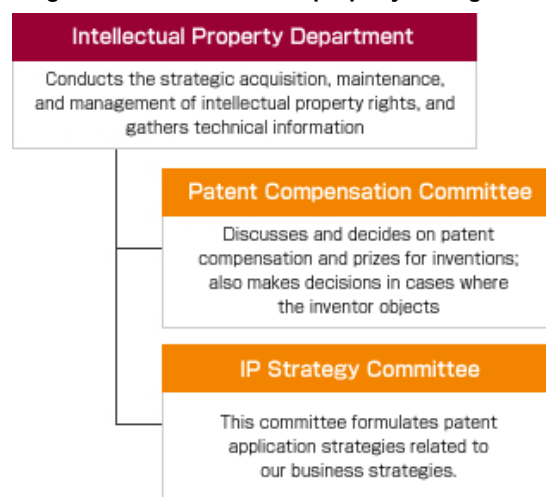

### Organization of Intellectual Property Management

The organization illustrated below was developed to ensure that intellectual property is managed appropriately on a global basis. In fiscal 2016, we revised our Group-wide intellectual property management system and selected IP strategic committee members from each business location in Japan and overseas.

IP strategic committee members who are selected by business leaders formulated patent application strategies related to our business strategies.

Employees in charge of intellectual property meet periodically with each IP strategy committee member to advance intellectual property activities related to our businesses.

#### Organization of Intellectual property management

### Employee Education about Intellectual Property

At Advantest, in order to improve awareness of intellectual property among all employees, we are conducting technical training for junior employees and e-learning for all Group employees.

In fiscal 2016, we conducted more expert-level education for technical staff by separating e-learning for technical staff and for general employees.

We will continue conducting this education for our employee in fiscal 2017.

### Disputes and Litigation Relating to Intellectual Property

As of 31 March 2017 there were no such disputes.

**Communication with Stakeholders**

Sustainability Report 2017

Advantest implements the following types of communication with stakeholders.

Main stakeholders	Main communication methods
Shareholders and investors	Shareholders' meeting, business report, and interim reports Financial results and Quarterly / Annual financial securities report Corporate governance reports Dissemination of information via the Sustainability report Holding of briefings for institutional investors and analysts each quarter on the day of publication of earnings announcement Implementation of regular overseas IR roadshows (at least once a year in each of North America, Europe and Asia), and participation in major IR events in Japan Individual meetings with domestic and overseas institutional investors
Customers	CSR questionnaire User group meetings (VOICE) Exhibitions (SEMICON, etc.)
Suppliers	Suppliers New Year Meeting Suppliers Reception QCD Cooperate Forum
Employees	Labor-bargaining

**Dialog with Shareholders and Investors**

**Shareholders' Meeting**

Advantest views the ordinary general meeting of shareholders (which constitutes the company's highest decision-making body) as also providing an important opportunity for dialog with all of the company's shareholders. We actively welcome questions from shareholders, and strive to reply to them in a considerate, easy-to-understand manner, endeavoring to help shareholders understand the measures that we implement in order to enhance the company's value.

At Advantest's 74th ordinary general meeting of shareholders, which was held in June 2016, the following proposals were all approved as submitted:

- Proposal: Appointment of six directors (excluding directors serving as Audit and Supervisory Committee Members)

A total of six questions were received from shareholders over the course of the ordinary general meeting of shareholders, all of which received replies from the Chairman or from the responsible directors. The ordinary general meeting of shareholders was followed by a social event, which combined displays of the company's products and business development plans with the provision of direct explanations by Advantest directors, in an effort to strengthen dialog with participating shareholders.

Question and answer session in progress at the shareholders meeting

**IR activities**

To fulfill the company's duty to demonstrate the company's accountability to shareholders and investors, and to further increase the level of trust placed in the company, Advantest has formulated an IR Basic Policy, and is working to foster more intensive communication with shareholders and investors under the direction of our CEO.

As regards the overall strategy for IR activities, Advantest discloses important information appropriately in order to ensure fair, thorough disclosure to shareholders and investors both in Japan and overseas. IR activities are implemented through designated IR spokespersons, including the CEO, Corporate Vice President, CFO, Executive Vice President and Vice President in Corporate Relations Group and IR personnel. Great care is taken to ensure that IR spokespersons do not disclose information that has not

yet been officially made public to small groups of shareholders or investors, and that there is no disparity between the information provided in dialog with different groups of investors and shareholders.

Besides the disclosure of information on the company’s website, another important IR activity is the quarterly business results briefings, at which senior Advantest managers give presentations. Advantest also holds individual meetings with domestic and overseas institutional investors (with around 330 such meetings being held in fiscal 2016) as well as business presentations, striving to help attendees develop a more in-depth understanding of the business environment within which Advantest operates and of the business strategies adopted by the company.

The useful suggestions that we receive from shareholders and investors in the course of engaging in communication with them are shared with the board of directors, and are utilized to help enhance Advantest realize sustainable growth and increase its corporate value over the medium and long term.

**2016 VOICE Conference Largest Ever**

The 10th VOICE Developer Conference held this year was a turning point that spanned the pacific ocean from May 10 to 11 at a venue in San Diego, California before the conference on May 18 at another venue in Hsinchu, Taiwan.

This year expanded the shape for the largest VOICE ever held with 7 new sponsors, 44 newly participating companies, and 150 abstracts as well as the highest amount of sponsorship and growth to 50% in the number of participants from the previous year. In Taiwan alone, 300 of the 600 customers, partner companies, and employees who were invited participated.

The program in San Diego announced 7 tracks with 99 people as well as exhibited 16 technical booths. The sessions started with a greeting from the VOICE 2016 chair before Micheal Campbell from Qualcomm lectured about “Technology & Trends Driving the Internet of Things.” The event also offered a sensational lecture that excited everyone from international best-selling author and adventurer Yossi Ghinsberg. An evening event in San Diego was held atop the USS Midway aircraft carrier.

The VOICE held for the first time in Taiwan offered 30 presentations. After greetings from each president of Advantest, President Colly Hwang from Digitimes lectured about “Making Differences Matter: A New Paradigm for the Asian Semiconductor Industry” at the keynote speech. Thereafter, the participants networked while enjoying festivities at an evening event.

Program in San Diego

Kick off of VOICE held for the first time in Taiwan

**Dialog with Suppliers**

To help build harmonious relationships with suppliers, Advantest holds an annual Suppliers New Year Meeting, Suppliers Reception and QCD Cooperate Forum with suppliers. Besides providing an opportunity for the presenting of awards that give recognition to suppliers who have made a particularly valuable contribution to Advantest’s business, these events also provide a forum for the exchange of views between suppliers and Advantest’s Chairman and Directors.

A scene from the QCD Cooperate Forum

**Dialog with Employees**

As opportunities for the dissemination of the Chairman’s Message and for dialog with employees, Advantest seeks to engage in communication with employees at the monthly Morning Meetings and Meetings of All Employees which are held at each business location, the New Year Greeting event held in January each year, the Spring Labor Talks which are held each year starting in March, the ceremony to mark the company’s founding which is held in July each year, the Central Labor Negotiations which are held in September each year, and various social events etc.
