7. The Cisco AnyConnect Mobility Client will launch a downloader window to check the PC/laptop certificate, security patch, etc...

	The AnyConnect Downloader is performing update checks	-
Q		-

- 8. The AnyConnect Downloader should download the installation file from the VPN server and install it onto your PC/laptop. After the Downloader installation completes, it will automatically launch Cisco AnyConnect Secure Mobility Client and use your provided Advantest credentials to login to VPN server.
- 9. When successfully connected to VPN, there is a window popup in the lower right-hand corner which displays the window below for 3-4 seconds.

10. You can also verify the status of VPN connection by referencing the icon in the system tray by moving mouse over the Cisco AnyConnect Secure Mobility Client with "Connected" status; or if you see a lock the icon, the VPN is successfully connected.

11. <u>The installation has been completed and connected to Advantest VPN.</u> You can close the browser you opened now.

If you experience any problems please contact the help desk: <u>https://helpdesk.advantest.com</u>

Below, are fact sheets that will answer some details about the newly installed client.

12. The Cisco AnyConnect Secure Mobility Client will be automatically launched when system rebooted; it will sit in system tray and is in an idle state; or you can find it in "Start" → "All Programs" → "Cisco" → "AnyConnect Secure Mobile Client"

How to disconnect VPN

 First way: click the up-arrow icon from the system tray and rightclick on "Cisco AnyConnect Secure Mobility Client" with lock icon, then choose "VPN Disconnect"

2. Second way: click the up-arrow icon from the system tray and click on "Cisco AnyConnect Secure Mobility Client", then click "Disconnect" button
