

All-in-One Evaluation Solution

EVA100 MEASUREMENT SYSTEM

RACK AND STACK EVOLVES TO ALL-IN-ONE

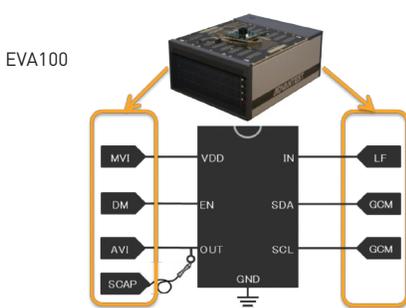

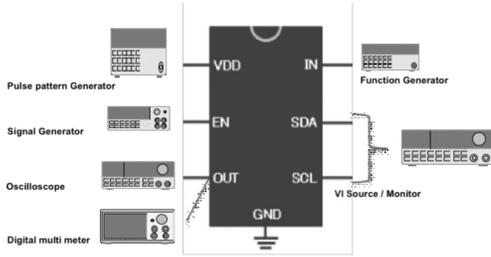

All-in-One Evaluation Solution

- Analog and Digital measurement instruments integrated into small footprint.
- Variety of measurements is achieved through "Measurement Atelier" our easy graphical user interface to support your engineering needs.

■ Simple measurement setup

- Integrate high end Analog/Digital measurement instruments
- Personal size and superior portability
- Program less intuitive software
- High timing accuracy synchronize measurement
- Report generate and Pass/Fail function
- Reduce calibration cost

■ Multi-measurement instrument set up

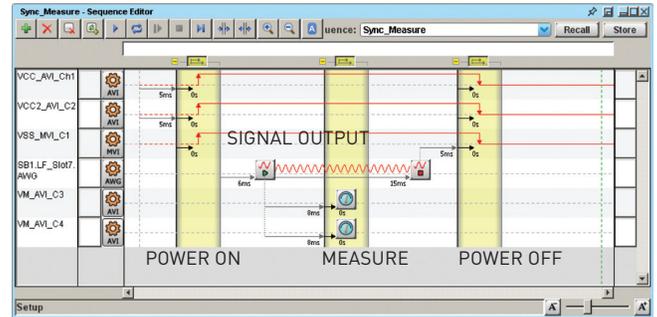

■ System configuration

- 12ch, 500mA DC Voltage current Generators (Analog VI Source)
- 2ch, 2A DC Voltage current Generators (Middle Power VI Source)
- 4ch 500MHz Oscilloscope (SCAP Source)
- 4ch, 200Ksps Arbitrary wave Generator (Low Frequency AWG/DGT)
- 4ch, 625Ksps Digitizer (Low Frequency AWG/DGT)
- 32ch, 100Mbps Pattern Generator (Digital Module)
- Control Module (General Control Module)
 - 8ch Protocol Interface: I2C, SPI, JTAG, Custom I/F
 - 64ch Relay Control
 - 10ns Resolution synchronize (Event Master Sequencer)

■ Intuitive User Interface Software

- Measure and Source setting like General Instrument
- Program-less sequence setting
- Multi module synchronous setting
 - Output On/Off control with 10ns accuracy
 - Multi Module and Multi task synchronous control

■ Analyzing and Reporting

- Easy to make report
- Measurement data and Pass/Fail judgment

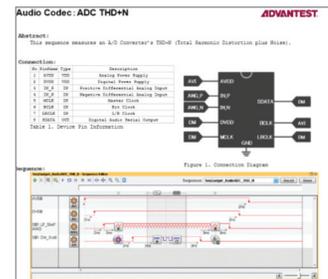

■ Easy measurement setup

- Use setting template
- Quick change parameter and measure

TEMPLATE

- ✓ PMIC(DC-DC)
- ✓ Audio Codec
- ✓ OPAMP
- ✓ ADC/DAC
- ✓ Digital Trim
- ✓ Analog Trim
